Mr. Lando. I was advised by the tax collectors office in Paradise irrigation district to write you a letter which I'm horrible about writing letters so anyhow, they said I could send you an email.

I'm going to try to explain my issue clearly to you

I lived at 507 Iris Ln. for 46 years and paid my water bill Faithfully

Last week I received delinquent tax bill and immediately called the tax collectors office

as I had paid my taxes. A very nice woman they named Stephenie advised me that the delinquent tax bill was for my property at 507 Iris Ln., Paradise.

I have not been getting bills for that property Last year. My son helped me find that bill online and I sent the tax collector \$500.

The delinquent tax bill I got was almost \$1200 Stephenie said it was prior years plus Paradise irrigation district charges added to it and penalty's etc.

I had no idea this was happening

Four years ago, I spoke to a girl at your office named Kimberly at that time asked her to please remove the meter from my property and not send me bills anymore which I assume she did. I was very happy it was taken care of for me. she was very very nice.

Last week when I got the delinquent tax bill, I called Paradise irrigation district after speaking to the tax collectors office, and I happen to get Kimberly again she remembered me and she told me that she sent me paperwork to sign to get that taken care of

Well, I never got any paperwork and if I did, I didn't realize what it was I just assumed it was all taken care of

Now I was over 80 years old when my property up there and my town burned so you know I'm old now and I won't be moving back up there

In fact, I can't hardly go into paradise without having anxiety attacks

I sat in that fire for 3 1/2 hours knowing I was going to burn alive and not knowing if my son was being burned alive. . I was on my way, trying to get my paralyzed son out of Yankee hill where he was so he would be safe. . They had to turn me around there's no way I could get to Yankee hill. Then I was trapped

Thank God for the first responders they got my son out and also also got me out

Anyway, I have no intentions of moving back to Paradise. I don't know what to do with that property. I was going to ask the neighbor if they wanted to buy it but I will eventually put it up for sale.

I was advised to ask you, if you would please reimburse me for all the bills attached to my taxes and discontinue any more bills for water or a meter of what ever at that property

I hope I explain this OK I'm not the smartest person there is, but I tried to make it clear If you have any questions or want any more information, please call me at [REDACTED]

Thank you so much please thank the girls for being so nice to me. I truly appreciate it.

Grace Covington (Bobbie )

MINUTES

REGULAR MEETING  
BOARD OF DIRECTORS  
PARADISE IRRIGATION DISTRICT  
MARCH 20, 2024

The regular meeting of the Board of Directors of the Paradise Irrigation District (PID) was called to order at 5:30 p.m. by President Bob Matthews followed by the Pledge of Allegiance to the Flag of the United States of America.

OPENING

BOARD MEMBERS PRESENT: Directors Patricia Guillory, Elliott Prest, Chris Rehmann, Vice President Shelby Boston, and President Bob Matthews

ROLL CALL

BOARD MEMBERS ABSENT: None

STAFF PRESENT: District Manager Tom Lando, Assistant District Manager Mickey Rich, Finance Manager/Treasurer Brett Goodlin, District Engineer Blaine Allen, Administrative Assistant Sarah Fenton, and Secretary Georgeanna Borrayo

ALSO PRESENT: Consultants Sami Kader and Joe Reiss with Water Works Engineers, and Nicole Maddox with Aptim Environmental & Infrastructure (participating remotely)

Board Members reviewed a letter included in the public comment section from Renee and Benjamin Moore concerning a PID mainline that runs through their property located at 5075 Eden Road in Paradise. The property owner is seeking assistance from PID to review the situation and options to re-route the main to allow for greater use of their property. Director Boston requested this item be placed on the April agenda for discussion and consideration.

PUBLIC COMMENT  
(Item 2)

Board Members reviewed Consent Calendar items as follows:

APPROVAL OF  
CONSENT  
CALENDAR  
(Item 3.a. to 3.i.)

- 3.a. Approval of Meeting Agenda Order
- 3.b. Approval of Minutes – Regular Meeting of February 21, 2024
- 3.c. Approval of Expense Report – February 2024
- 3.d. Approval of Water Service Facilities Agreement – Paradise Senior Associates
- 3.e. Approval of Water Service Facilities Agreement – Mercy Housing California
- 3.f. Approval of Public Utility Abandonment for 1300 Deodara Way, Paradise, CA
- 3.g. Approval of Revisions to Standard Drawings PID-02 and PID-07 in the PID Pipeline Installation Procedures and Specifications
- 3.h. Approval of Addendum No. 2 – Community Relations Consulting Services Agreement with Cedar Creek Communications
- 3.i. Approval of Notice of Completion & Acceptance: Reservoir B Replacement Project
- 3.j. Approval of Notice of Completion & Acceptance: Meter Installation & Service Lateral Phase 2 Project

It was moved by Director Boston and seconded by Director Guillory to approve the Consent Calendar as presented.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews

NOES: None

ABSENT: None

**Motion passes 5-0**

ACCEPTANCE OF  
TREASURER'S  
REPORT FOR  
PERIOD ENDING  
FEB. 29, 2024  
(Item 4.a.)

Board members reviewed a written Treasurer's Report prepared by Finance & Accounting Manager Brett Goodlin for the period ending February 29, 2024, highlighting the District's cash position, debt service analysis, operational overview, investment income, and grant income and reimbursements.

It was moved by Director Rehmann and seconded by Director Prest to accept the Treasurer's Report as presented for the period ending February 29, 2024.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews  
NOES: None  
ABSENT: None  
**Motion passes 5-0**

COMMITTEE  
REPORTS:

Finance Committee:

POLICY  
AMENDMENT  
ADOPTED:  
CHAPTER 13 –  
BUDGET, AUDITS,  
ACCOUNTING &  
FINANCE  
(Item 5.a.1.)

Item 5.a.1 – Amendment to PID Policy & Procedures, Chapter 13: Board members considered a proposed policy amendment to PID Rules & Regulations, Chapter 13 – Budget, Audits, Accounting and Finance, which has been reviewed in advance by the Finance Committee.

It was moved by Director Prest and seconded by Director Guillory to adopt the proposed revisions to PID Rules & Regulations Chapter 13.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews  
NOES: None  
ABSENT: None  
**Motion passes 5-0**

LONG-RANGE  
FINANCIAL  
FORECAST  
PROPOSAL FROM  
BAKER TILLY  
APPROVED  
(Item 5.a.2)

Item 5.a.2 - Long-Range Financial Forecast Model Proposal: District Manager Tom Lando reported the proposal for consideration is presented by Baker Tilly US, LLP to assist the District with developing a long-range financial forecast (fiscal model). The model will provide managers and policymakers about costs and resources necessary to fulfill the District's service delivery expectations in the coming years.

It was moved by Director Prest and seconded by Director Guillory to approve the proposal from Baker Tilly US, LLP to develop a long-range financial forecast model for the Paradise Irrigation District and authorize the District Manager to execute an Agreement on behalf of the District.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews  
NOES: None  
ABSENT: None  
**Motion passes 5-0**

PID STAFF &  
CONSULTANT  
REPORT UPDATES  
(Item 6.a. – 6.g.)

Board members reviewed written staff and consultant reports presented in the agenda packet. Discussion included: 1) The Paradise Ridge Chamber of Commerce is hosting The Ridge's first ever Open House Weekend on June 1<sup>st</sup> and 2<sup>nd</sup> featuring businesses and organizations from the Ridge community. PID will be participating in this event; 2) A meeting with a delegation from Maui will be held on Saturday, March 23 at 2:45 p.m. at the Paradise Town Hall. PID staff will be participating and providing a presentation; 3) Water Supply Recovery Program Update from Water Works Engineers; and 4) Post Fire Disaster Public Assistance & Recovery Management Services Update from Aptim Environmental & Infrastructure.

Assistant District Manager Mickey Rich reported staff has prepared the proposed amendments to Chapter 7.10 of the PID Rules and Regulations to facilitate the Board request to extend the current Customer Assistance Program (CAP) to up to one water service account for vacant land property owners. Staff recommends making the policy effective for the next billing cycle effective May 1, 2024 with recertification each year.

UNFINISHED  
BUSINESS:  
AMENDMENT TO  
CUSTOMER  
ASSISTANCE  
PROGRAM (CAP)  
(Item 7.a.)

It was moved by Director Boston and seconded by Director Guillory to accept the proposed amendments to PID Rules and Regulations, Chapter 7.10, Customer Assistance Program, effective May 1, 2024.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews  
NOES: None  
ABSENT: None

**Motion passes 5-0**

Staff reported Paradise Irrigation District recently issued a Request for Proposal (RFP) for Pavement and Concrete Repair Work on District projects. Proposals were submitted by Santos Excavating, Inc. and RCI General Engineering with Santos Excavating being the low bidder.

NEW BUSINESS:

CONTRACT  
AUTHORIZATION  
FOR ASPHALT &  
CONCRETE PATCH  
PAVING & REPAIR  
(Item 8.a.)

Scheduled paving work bid as a lump sum in the RFP includes Dora Lee Lane, Woodsdale Lane, Valley View Drive, and a concrete sidewalk repair at Dutch Brothers. The total lump sum cost submitted by Santos Excavating was \$46,465.10. Staff further noted the proposals also contained unit pricing for patchwork that may be required over the next twelve months for PID projects completed in roadways, sidewalks, or driveways.

It was moved by Director Boston and seconded by Director Prest to authorize the District Manager to execute an agreement with Santos Excavating, Inc. to perform necessary Pavement and Concrete Repair Work through April of 2025 for the cost as outlined in their proposal.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews  
NOES: None  
ABSENT: None

**Motion passes 5-0**

Board members reviewed a memo from PID staff regarding the condition of two district-owned properties along Clark Road that have been managed as rentals in the past but are now vacant. Based on necessary renovations for both properties, staff is seeking direction from the Board. Staff noted based on business needs, the District would benefit from making renovations to the house and utilizing as additional office space and either demolishing the commercial building or using for an additional storage option.

PID PROPERTIES:  
CLARK ROAD  
RESIDENTIAL  
HOUSE AND  
COMMERCIAL  
BUILDING  
(item 8.b.)

Board direction was given to staff to distribute a Request for Proposal to repair the house for use as office space and to demolish the commercial building. Director Boston recommended looking into digitizing all PID records.

District Manager Tom Lando indicated staff would like to hold a budget workshop in May and requested input from the Board on whether they would like to schedule a special meeting or combine with the regularly scheduled Board of Directors meeting on May 15. Board consensus indicated a preference to have the budget workshop during the May 15 Board meeting.

PID BUDGET  
WORKSHOP TO BE  
HELD DURING  
MAY 15, 2024  
REGULAR BOARD  
MEETING  
(Item 8.c.1)

JUNE 17, 2024  
BOARD OF  
DIRECTORS  
MEETING -  
CONFIRMED TIME  
OF 5:30 PM  
(Item 8.c.2)

During the regular meeting of the Board of Directors held on February 21, 2024, Resolution No. 2024-02 was adopted to amend the meeting time of all regular meetings of the Board of Directors to 5:30 p.m. Previously, the regularly scheduled Board meeting for the month of June 2024, was rescheduled from June 19 to June 17 at 8:00 a.m. as June 19 is an observed holiday. Board members confirmed availability to adjust the meeting time from 8:00 a.m. to **5:30 p.m. on June 17, 2024.**

CONSIDERATION  
TO SET A SPECIAL  
MEETING DATE  
RE: LABOR  
NEGOTIATIONS  
(Item 8.c.3)

District Manager Tom Lando indicated the District anticipates receiving a draft Classification & Compensation Study Report from CPS HR Consulting in April and polled the Board members on whether they would like to set a special meeting date for review or have discussion at the regularly scheduled April Board of Directors meeting. Board members concurred to place this item on the agenda for the regularly scheduled meeting on April 17, 2024.

PID  
INFRASTRUCTURE  
DAMAGE POLICY  
APPROVED  
(Item 8.d.)

Assistant District Manager Mickey Rich indicated the proposed addition to PID Rules and Regulations, Chapter 6, was developed by PID Legal Counsel to address recurring damage to PID infrastructure caused by negligence. PID has historically collected for damage to its system, however, since the Camp Fire, there has been a vast increase in infrastructure damage. This policy seeks to reduce the instances of damage by adding penalty for negligent damage.

It was moved by Director Guillory and seconded by Director Prest to adopt the proposed additions to PID Rules and Regulations, Chapter 6.15.

AYES: Directors Guillory, Boston, Prest, Rehmann, and President Matthews

NOES: None

ABSENT: None

**Motion passes 5-0**

DIRECTORS'  
COMMENTS  
(Item 9)

Director Rehmann reported he and Director Guillory attended the NCWA Annual Meeting in Chico on March 18 and found the meeting to be very informative. Additionally, he received confirmation from the Sites Reservoir Team Manager the date of Friday, April 26, 2024 is available for a tour of the proposed Sites Reservoir.

ADJOURNMENT

There being no further business, it was moved by President Matthews to adjourn the meeting. The regular meeting of the PID Board of Directors was adjourned at 6:17 p.m.

\_\_\_\_\_

# Paradise Irrigation District

6332 Clark Rd, Paradise, CA 95969 · 530-877-4971 · Fax: 530-876-0483 · [www.pidwater.com](http://www.pidwater.com)

**DATE: April 10, 2024**

**TO: Board of Directors**

**FROM: Tom Lando, District Manager  
Blaine Allen, District Engineer**

**RE: Award of Contract for Gabion Wall – Magalia Dam Spillway  
04/17/2024 Board of Directors Meeting**

The District recently issued a Request for Proposals (RFP) for the construction of a Gabion Wall in the Magalia Dam Spillway. This is a repair required by the Division of Safety of Dams (DSOD) as an interim risk reduction measure due to hazards identified in our spillway after inspections triggered by the Oroville Dam Spillway disaster.

Six Contractors submitted proposals with the lowest bid received from McIntosh Equipment.

Staff reviewed all proposals for completeness and checked with McIntosh Equipment for similar projects, related experience, and schedule availability to be able to perform the project. Staff is recommending the Board accept the proposal from McIntosh Equipment to construct the Gabion Wall.

Action Requested:

*"Authorize the District Manager to execute an agreement with McIntosh Equipment to construct a Gabion Wall in the Spillway at Magalia Dam for a cost of \$128,900.00, plus an additional 15% contingency value of \$19,335.00 to be executed at the discretion of the District Manager or designated representative."*

## Treasurer's Report - March 2024

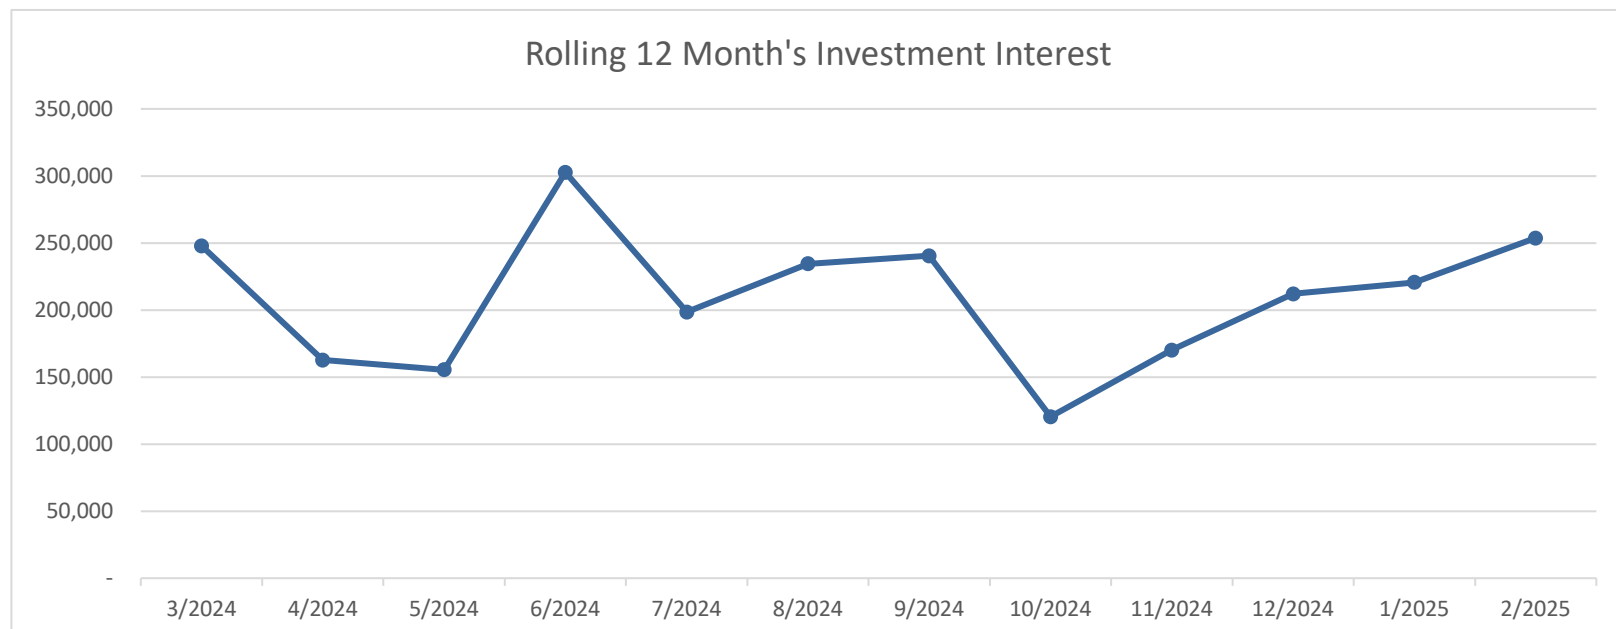

### 1. Cash, Cash Equivalents, & Investments:

As of month end the District's net position was \$100,286,873, up 11.82% from last month.

- a. Cash holdings at Tri Counties Bank: \$14,962,131 at 5.49%
- b. Cash holdings at CA CLASS: \$2,474,625 at 5.421%
- c. Cash holdings at LAIF: \$2,641 at 4.12%
- d. Cash holdings at Meeder: \$338,181 at 4.72%
- e. Investment at Meeder: \$82,509,295 at 3.87%

As reimbursements are received from Federal and State grant partners, staff is evaluating the balance of cash and equivalents compared to what is held in the investment portfolio for longer term growth. Current interest rates are favorable for keeping a year's worth of expected expenditures in cash & equivalents.

As of month end, current investment holdings will produce \$2,630,595 of interest earnings as displayed in the graph above. This graph shows the interest that will be earned each month for the following 12 months.

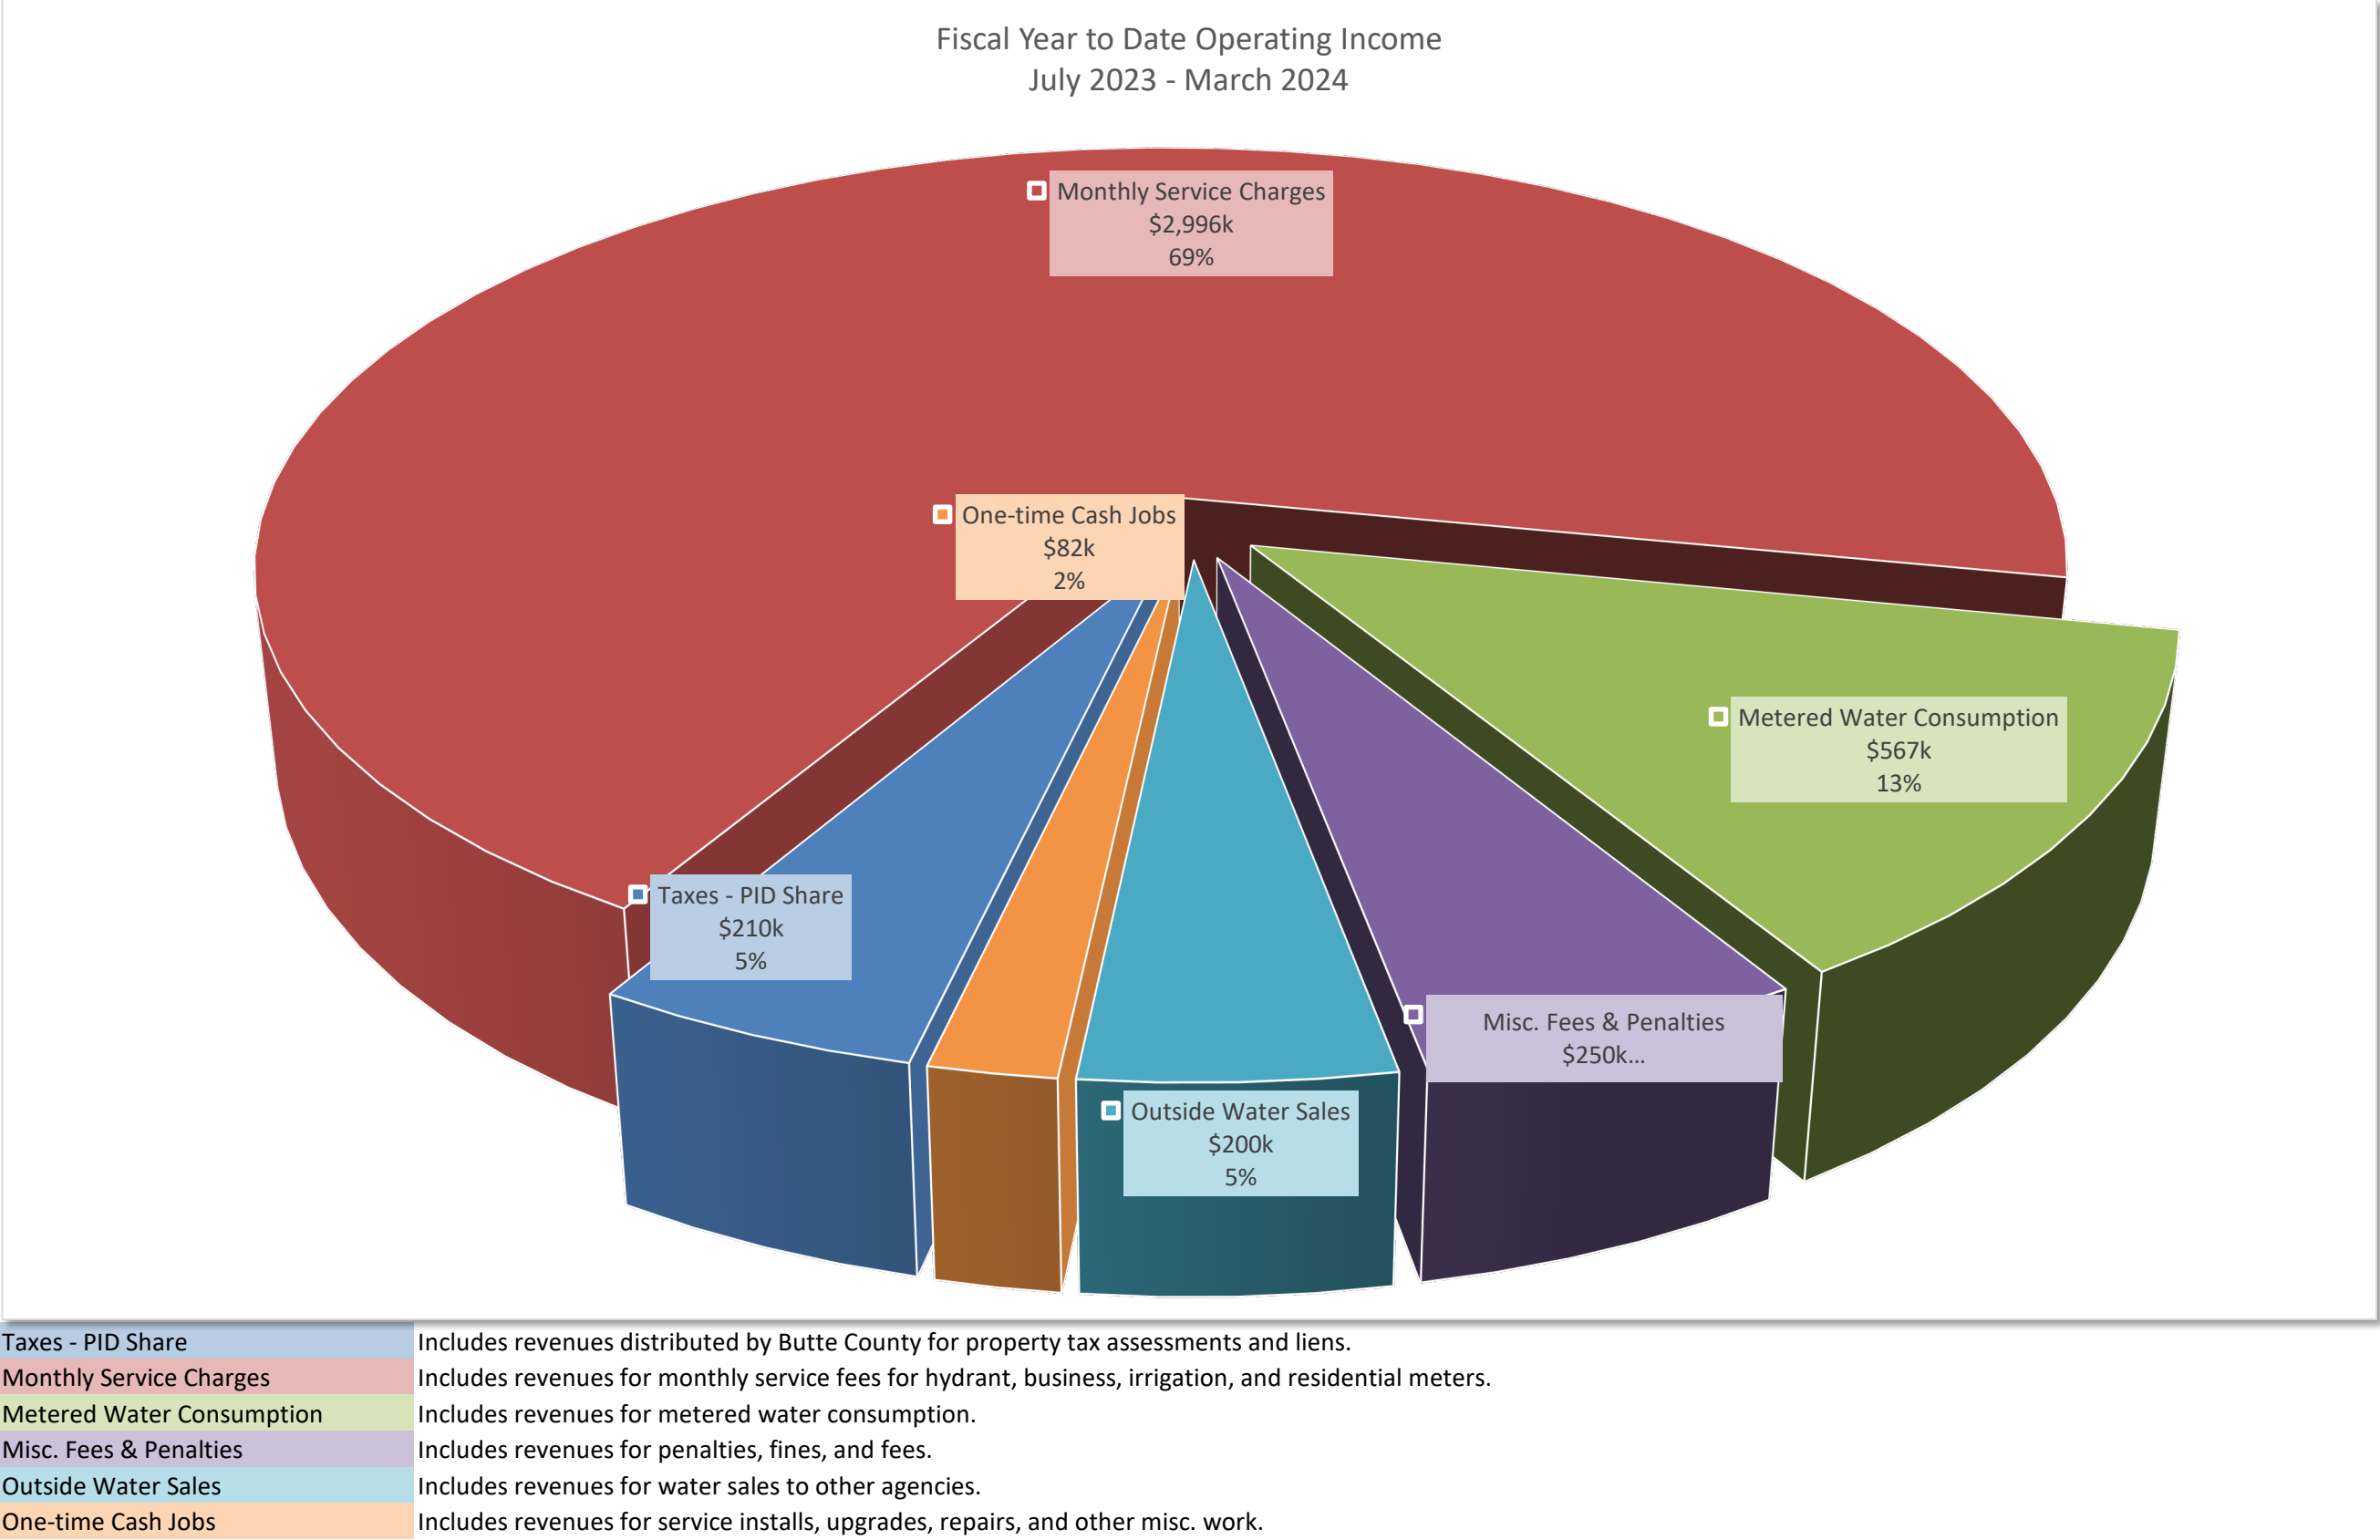

### 2. Debt Service:

As of month end the District has outstanding debt of \$1,374.095 and has one more loan payment to make this fiscal year.

- a. 2017 Refinance Loan (Truist): \$321,000 at 2.28%
- b. 2007 Magalia Bypass Loan (iBank): \$1,053,095 at 1.00%
- c. Total interest paid on loans in FY2024 will be \$55,149

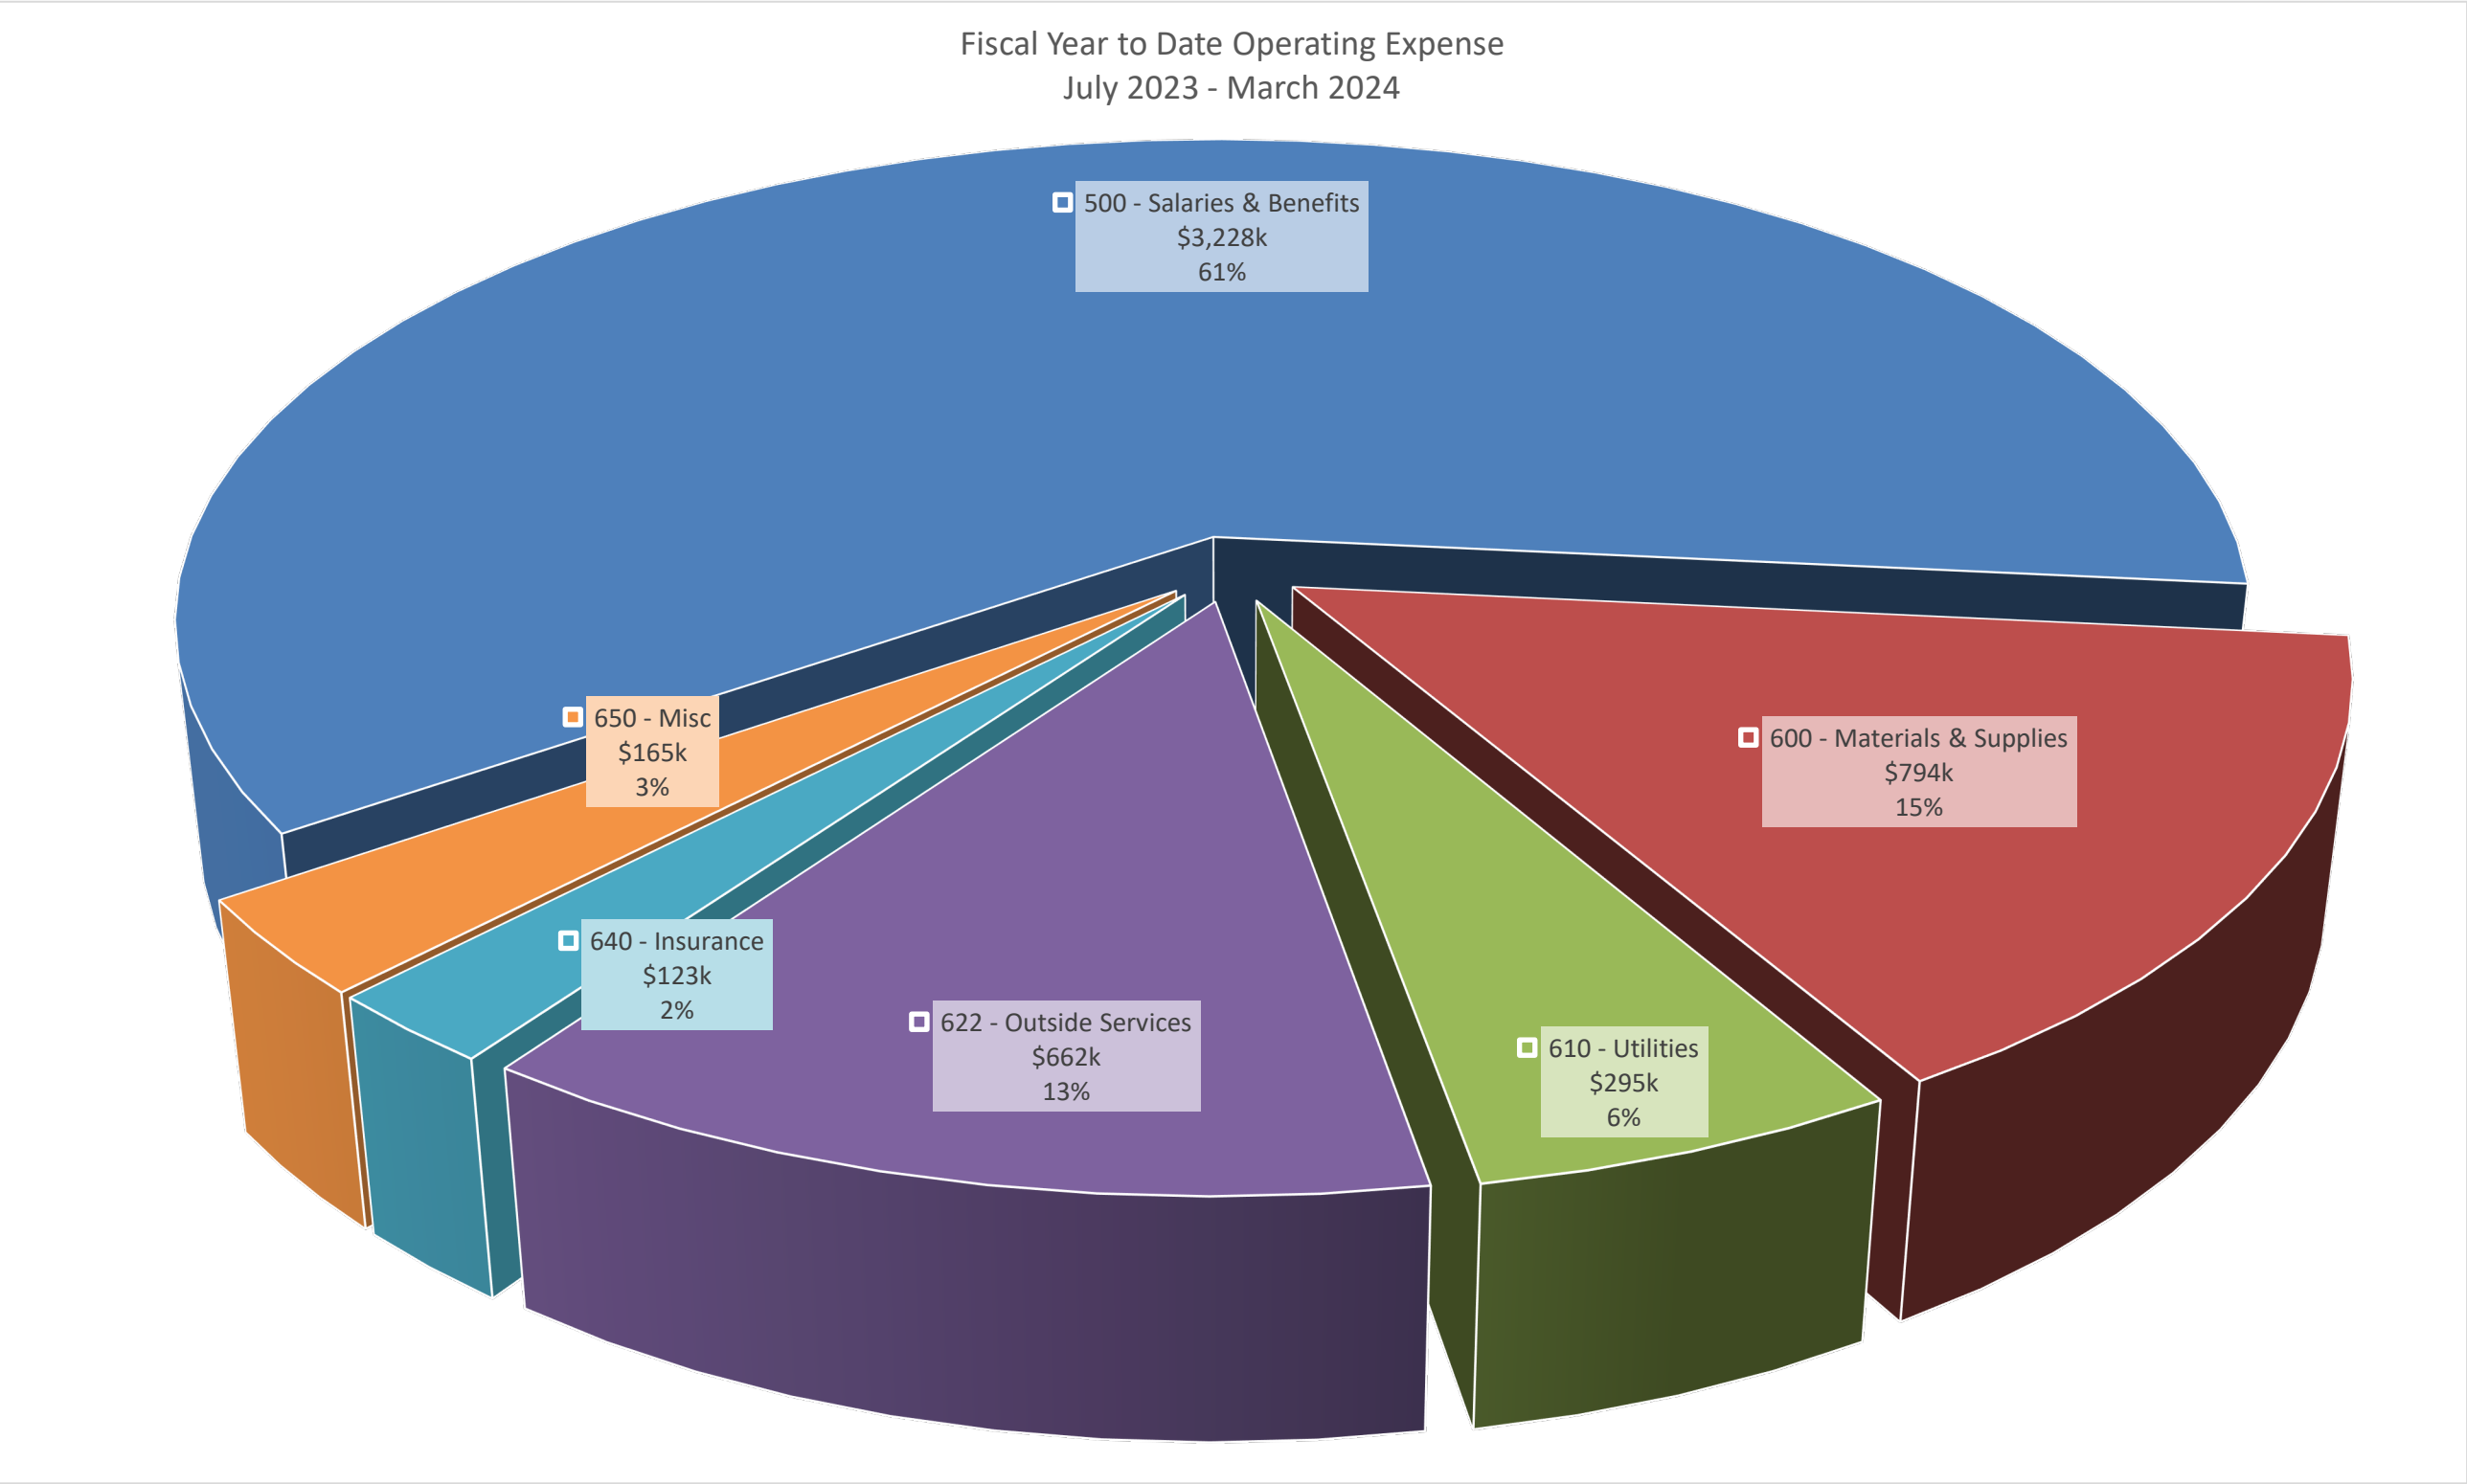

3. Revenues - As of month end the Distric's total income recognized YTD was \$21,606,404

Operating Income		YTD Actuals	YTD Budget	FY24 Budget
Water Service, Fees, & Consumption Installations and Custom Work		\$ 4,222,459	\$ 4,260,174	\$ 5,680,232
		\$ 82,348	\$ 49,500	\$ 66,000
Total Operating Income		\$ 4,304,807	\$ 4,309,674	\$ 5,746,232

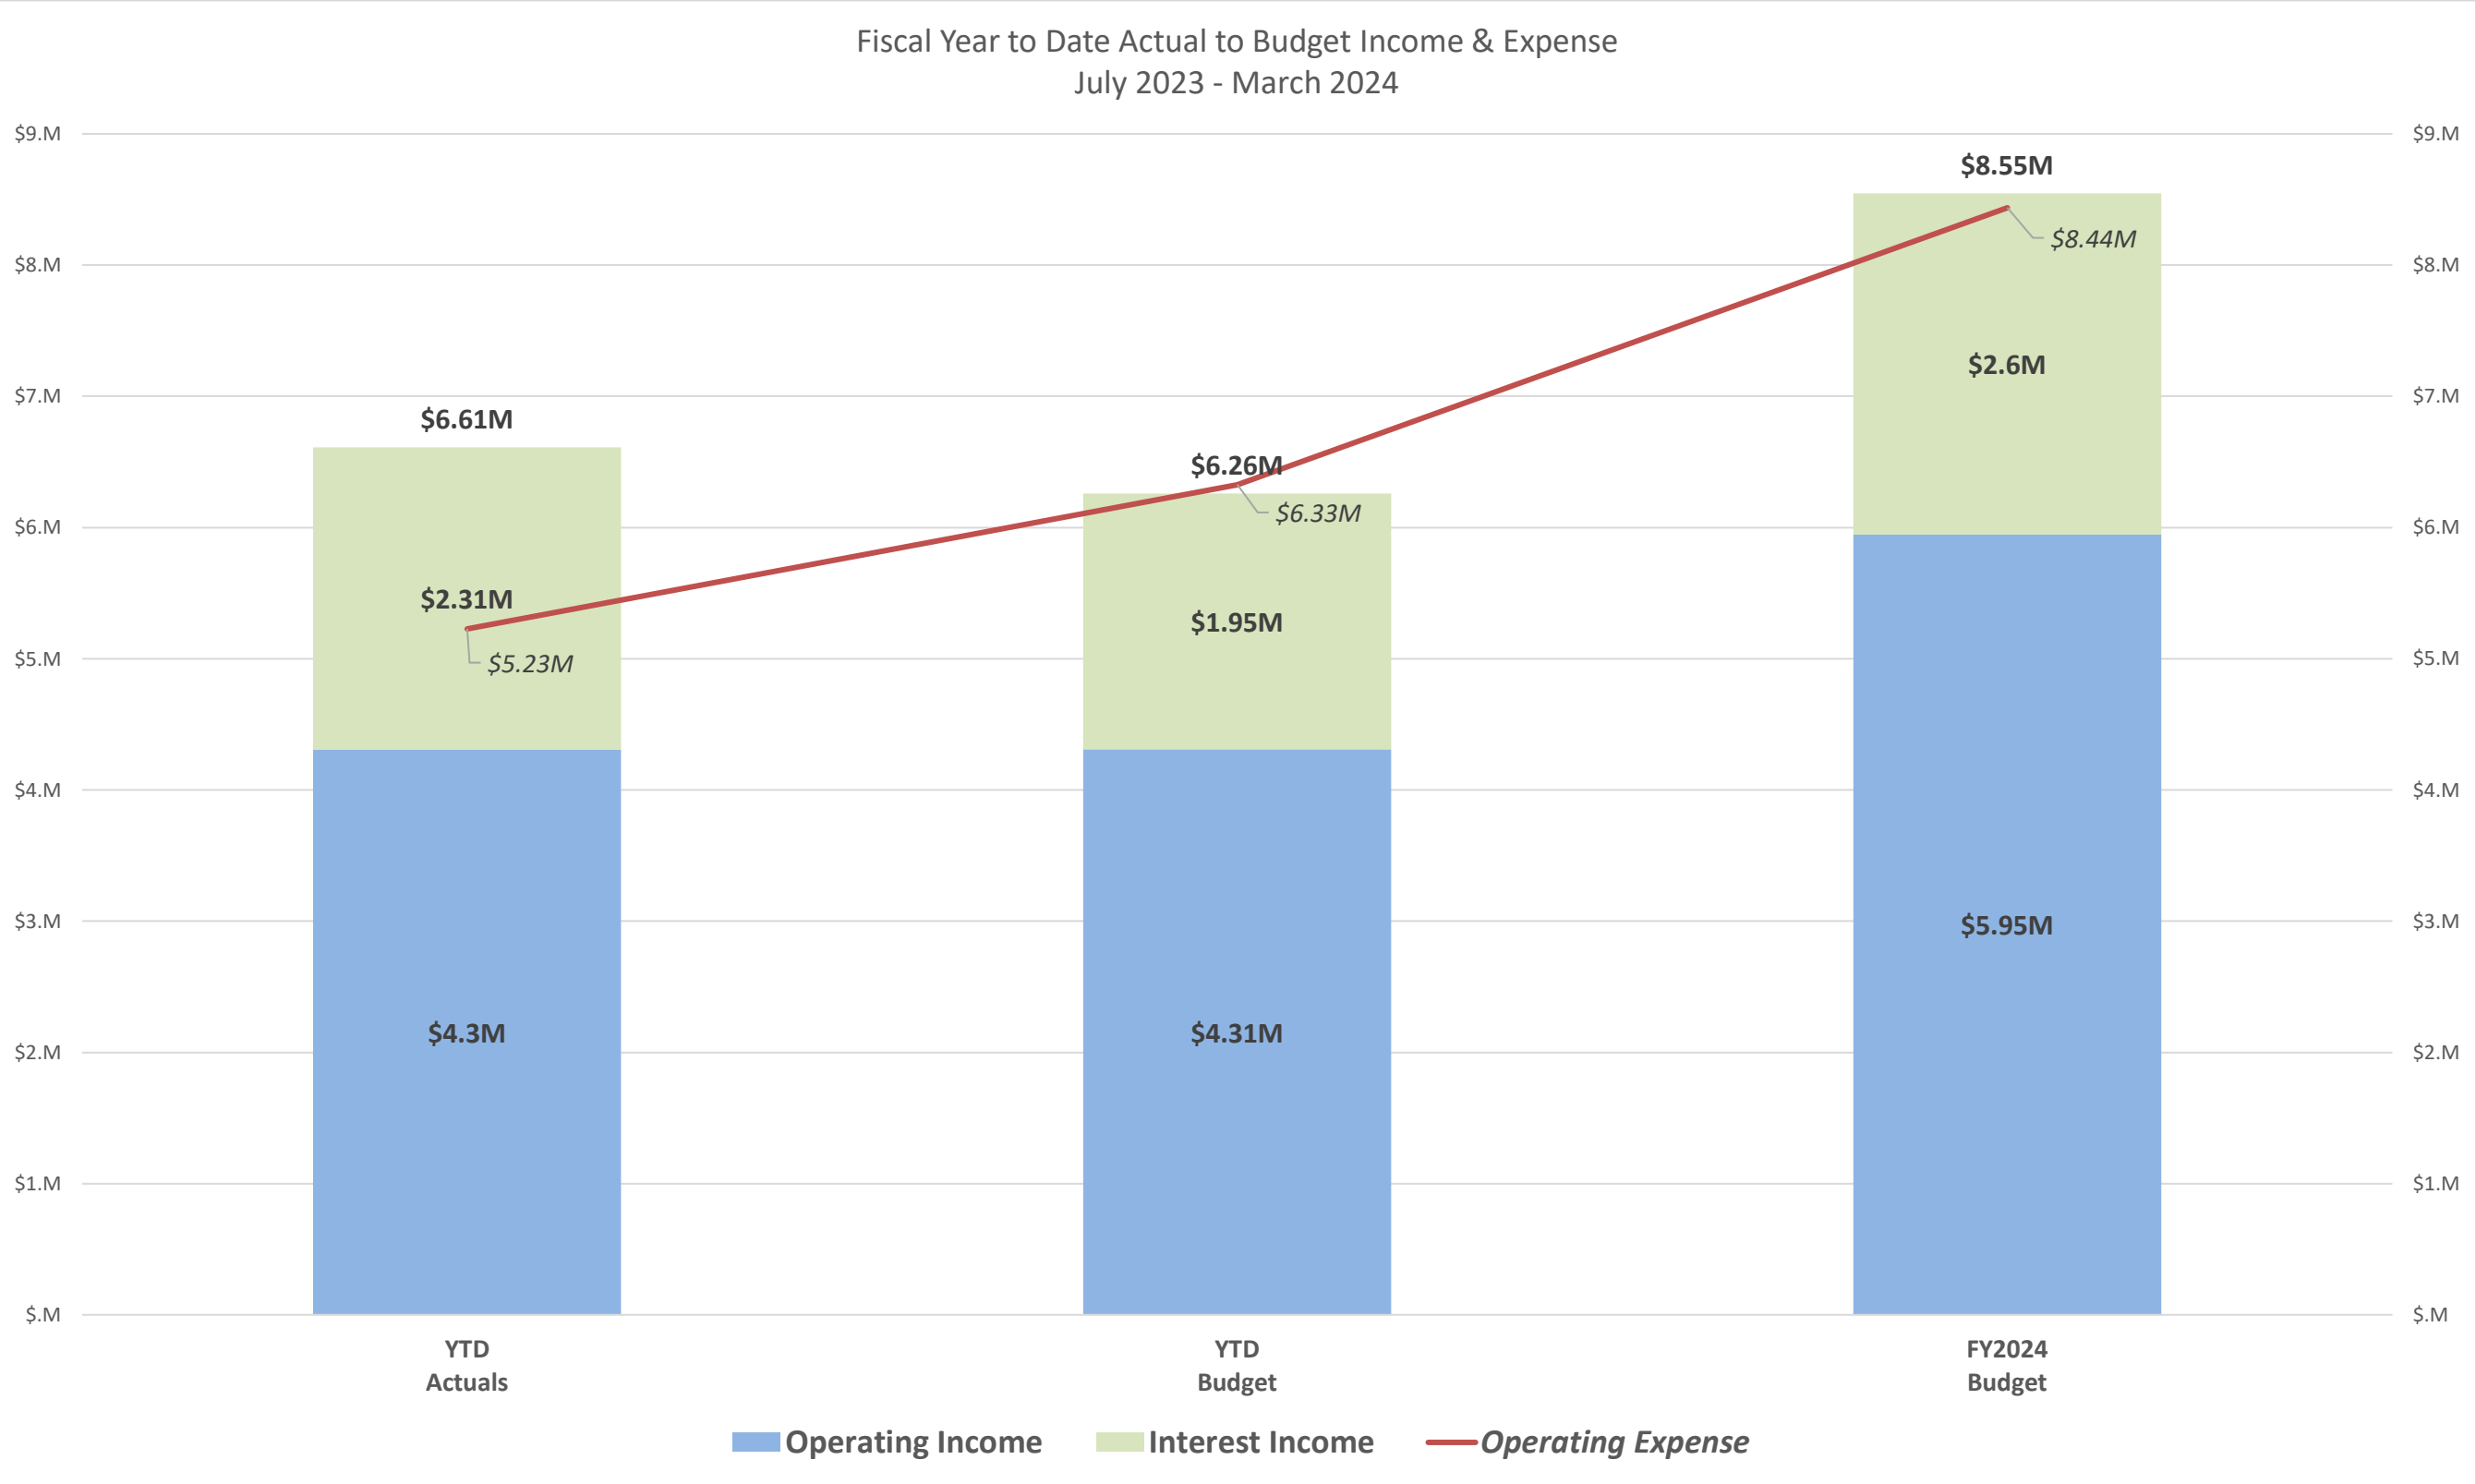

4. Expenses - As of month end the Distric's total cash expenditures YTD was \$5,227,522

Operating Expense		YTD Actuals	YTD Budget	FY24 Budget
	Source of Supply & Treatment	\$ 1,236,670	\$ 1,697,250	2,263,000
	Transmission & Distribution and Meter Shop	\$ 2,209,548	\$ 2,661,750	3,549,000
	Administration	\$ 1,781,303	\$ 1,968,750	\$ 2,625,000
	<b>Total Operating Expense</b>	<b>\$ 5,227,522</b>	<b>\$ 6,327,750</b>	<b>\$ 8,437,000</b>
Recovery & Capital Expenses				
	<b>Total Recovery Expense</b>	<b>\$ 15,032,388</b>	<b>\$ -</b>	<b>\$ -</b>

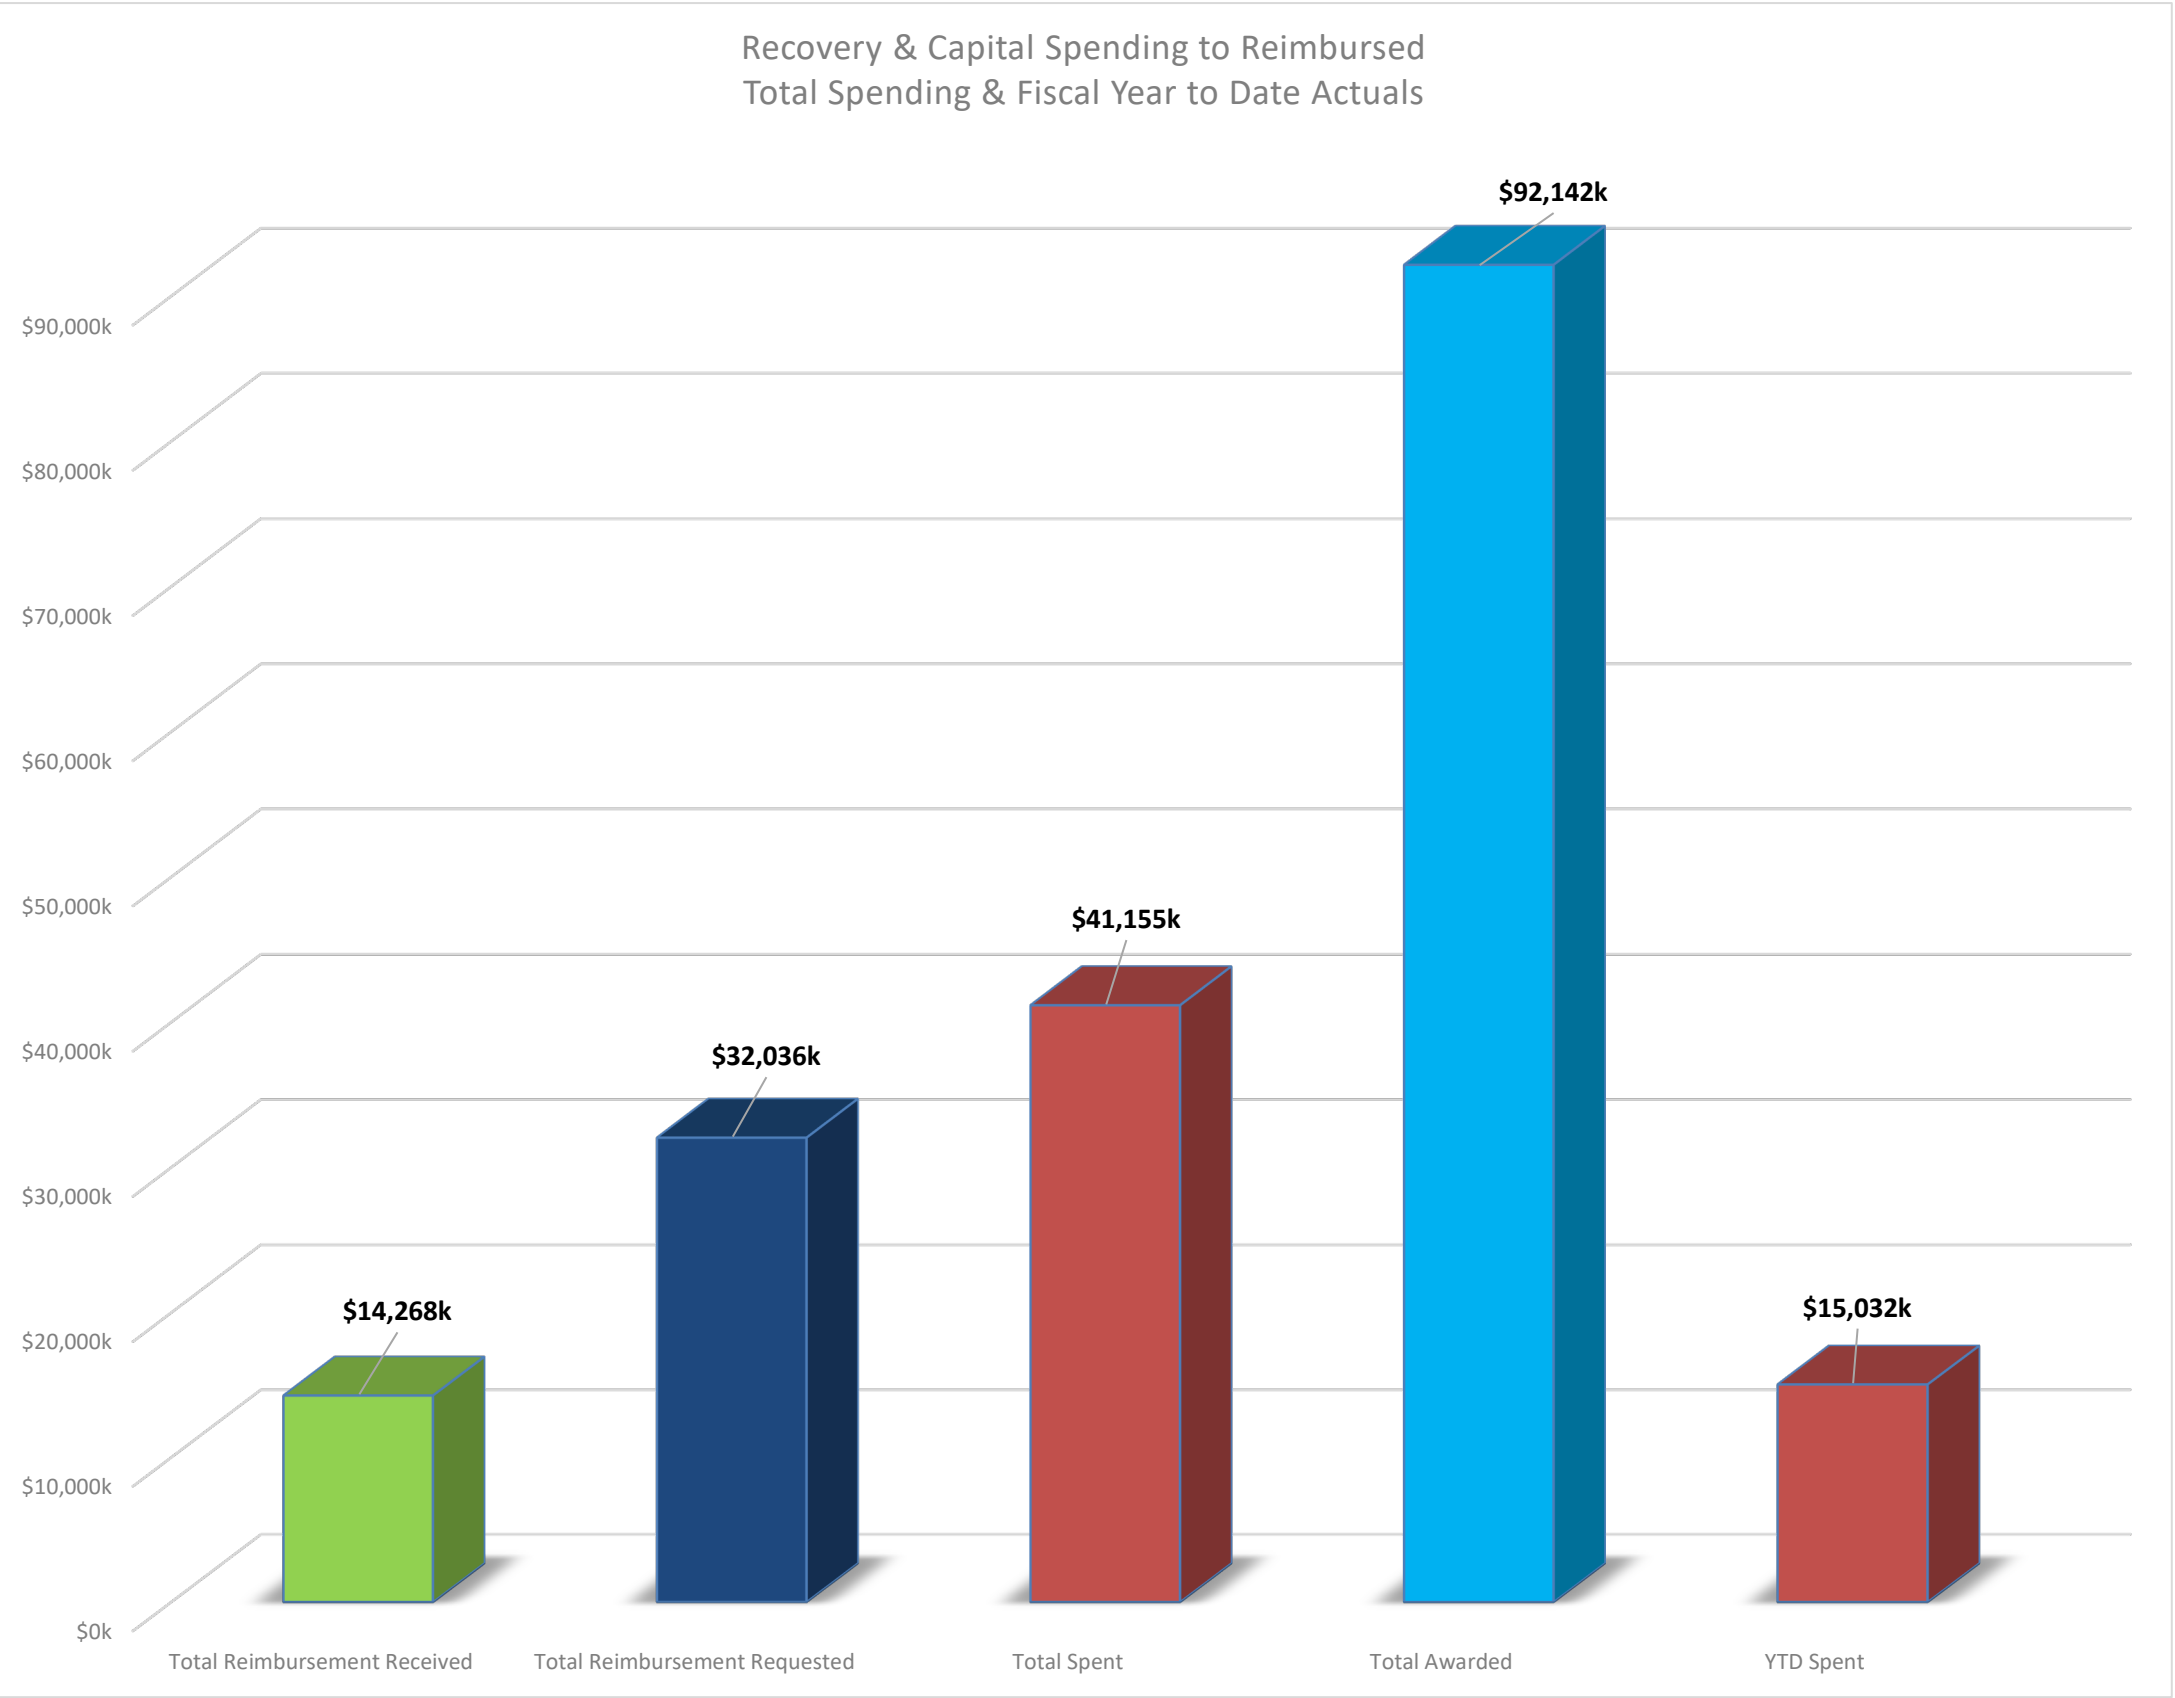

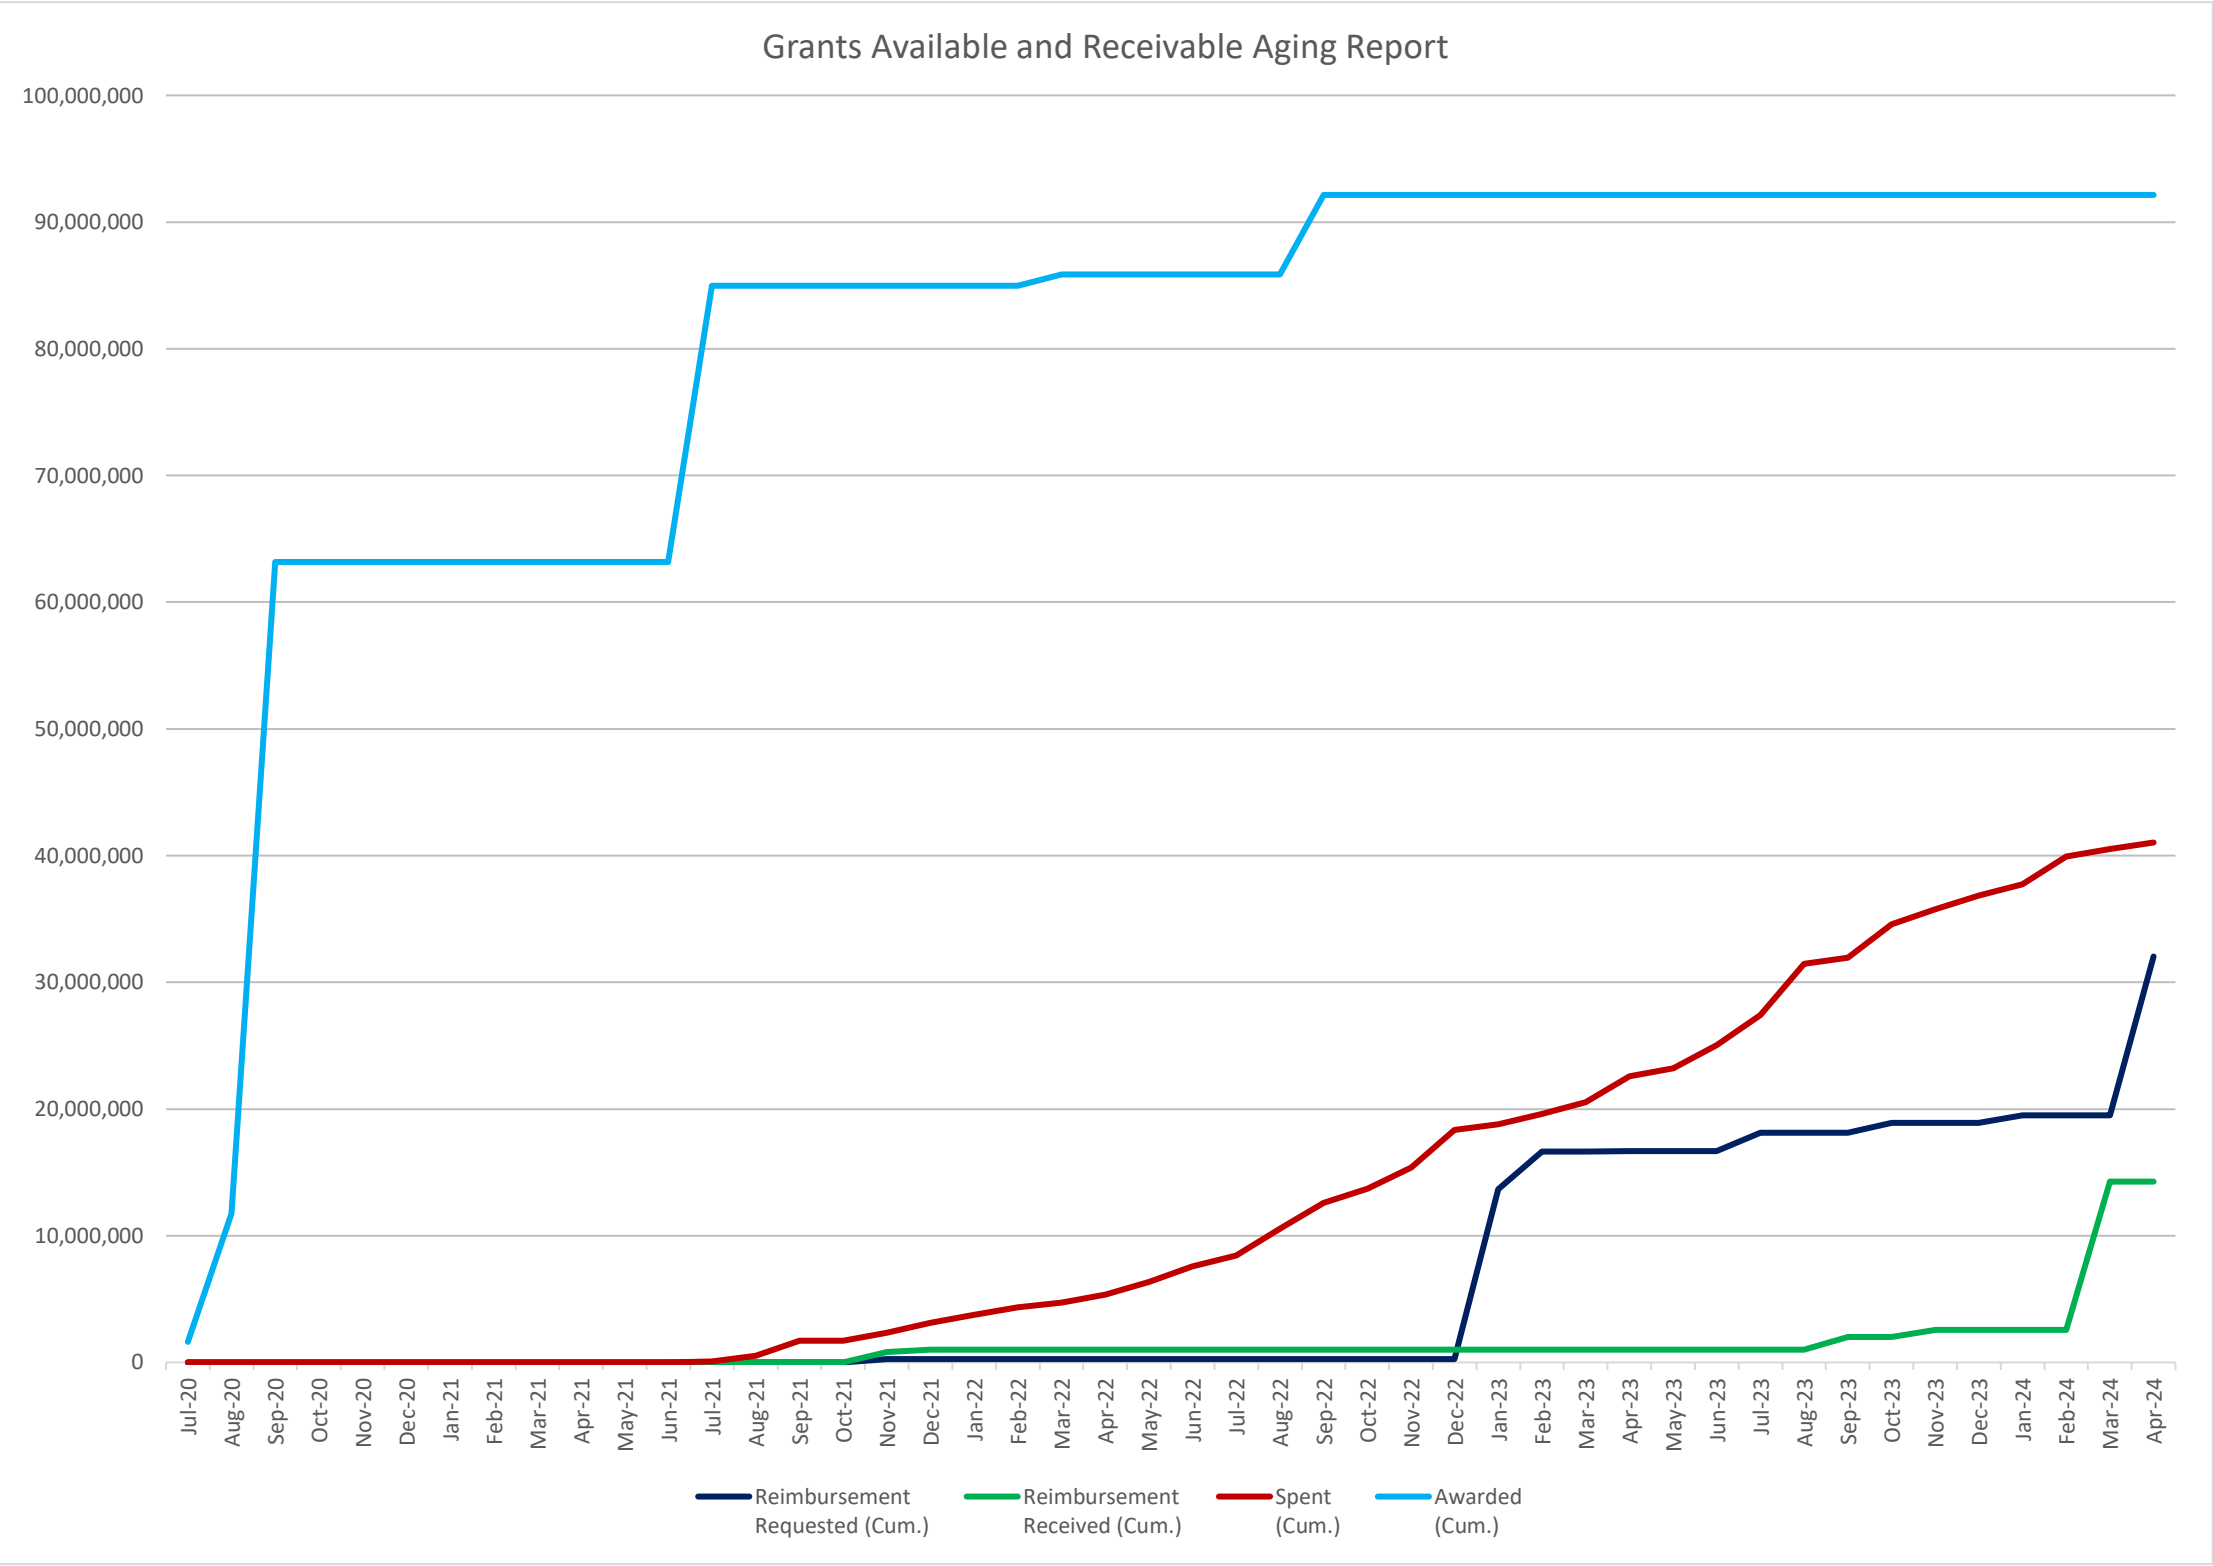

5. Budget - As of month end the Distric's has collected 75% of the operating revenue budget and has spent 62% of the operating expense budget.

6. Recovery & Capital Projects

**Projects being reported**

Project	Reimbursement Received (Cum.)	Reimbursement Requested (Cum.)	Spent (Cum.)	Awarded (Cum.)

Report Key	
400 - Taxes - PID Share	Includes revenues distributed by Butte County for property tax assessments and liens.
401 - Water - Service	Includes revenues for monthly service fees for hydrant, business, irrigation, and residential meters.
402 - Water - Consumption	Includes revenues for metered water consumption.
403 - Water - Fees & Adjustments	Includes revenues for penalties, fines, and fees.
405 - Outside Water Sales	Includes revenues for water sales to other agencies.
425 - Non-Recurring Services	Includes revenues for service installs, upgrades, repairs, and other misc. work.
460 - Interest Income	Includes revenues earned from investments and savings.
465 - Rental Income	Includes revenues (net) earned from rental properties.
475 - Investment Gain/Loss	Includes revenues from realized and unrealized investment activity.
470 - Grant Income	Includes revenues from awarded grants that are not reimbursements.
490 - Reimbursements	Includes revenues from contracts, damage repairs, and small insurance claims.
495 - Grant Reimbursements	Includes revenues from requested expenditures of grant funds.
499 - Other	Includes revenues from settlements and all other sources that are nonrecurring.
Source of Supply:	Includes expenses related to the initial collection and holding of the District's raw water (the dams & reservoirs).
Water Treatment:	Includes expenses related to the treatment and of the District's water.
Transmission and Distribution:	Includes expense related to the maintenance of the District's ability to store and distribute treated water.
Customer Service / Meter Shop:	Includes expenses related to the maintenance and support of the District's backflow and water metering devices.
Administration:	Includes expenses related to the administration, engineering and regulatory aspects of the District's operations.

A few suggestions

Multiple suggestions

A few suggestions

# Open-Ended Responses

1. whatever is needed. @ legitimate need for clearing lots-not just one or 2 weeds or calls from neighbors

5+ years after Campfire, additional fuels in Paradise proper and Magalia continue to grow and need aggressive management vegetation, not just around the lake and reservoir. Thank you for your efforts to control it.

A needed process

Accumulate, bury and mulch. It fertilizes and help rebuild the water tables.

After 2008 fires- Grass, brush & bushes grew wild so when 2018 campfire- lots of fuel burned fast & hot & wind spread the fire. Must keep vegetation under control.

Air quality is horrible

All vegetation management should be done under the direction of a registered professional forester. Herbicide treatment should be included as a vegetation management option.

Any burning methods should be a notification to all clients, the others; only as it applies to general vicinity to my home.

Appreciate the efforts!

Appreciate the focus on quality water and fire prevention!! Thank you 😊

Area between sunview RD & Lie Saddle, Survived camp fire and no vegetation control since I lived her 20 years

as with integrated pest management. A combination is the best bet. Some areas are too steep for mastication, but fires release too much CO2 too fast and should be used in limited amounts. Bare ground should be avoided!!

Avoid Burning materials over exposed serpentine surrounding watershed areas- toxic chemicals (hexavalent Chromium) produced

Badly Needed!

Be careful not to pollute our water sources

Be very careful and have strict guidelines for prescribed burns.

Bring back good fire to the ridge

Burn Piles & Prescribed fires fill people's homes with smoke! Allergies asthma severely affected. Smel lingers in homes and yards. Very inconsiderate & restrictive to residents.

Burning adds to the global warming & pollution

Burning not good for the environment. Mastication good for soil. Recycled veg can be re-used.

Burning vegetation on site destroys seeds of flammable invasive species such as scotch broom and tree of heaven. Removing & transporting them can spread the seeds to other areas.

Can the vegetation be taken to durham wood and used at a CO- generation plant?

Choose something that will improve the health of the land. Mastication is not good for the land.

Contact me to set up a time for your office to do an inspection before proceeding.

Continuing work in sustainably managing vegetation is crucial to the watershed's ecosystem.

Creeks and other intown waterways need to be cleaned. Look at Chico's Lindo Channel

cut and give away wood. Reduce property growth trees. Remove trees on street take every other one.

Cutting and burning is great except for materials that cause irritation when smoke is inhaled- please notify when any burning is taking place to avoid anxiety. Thank you for keeping the towns future safe!

Dead tree removal- too much of a visual reminder

Definitely do not approve of cutting, masticating, or burning! Love the idea of grazing and hand work as needed.

Do more and soon!! Have people clean up their property

Do vegetation management in the winter and spring part of year not during the driest hottest part of the year.

doing removal with the least amount of pollution and air quality harm is in my opinion the best for everyone.

Don't appreciate spraying of roadside vegetation and then not removing it after it has dies.

Don't burn our towns down

Don't spay poison on plants by roadside. It just causes blighted conditions and increases the risk of more fire!

Due to camfire & following winds many dead trees & stumps still have not been removed & log piles

Due to sever asthma I am against any burning

Expensive

Follow Native American practice and be kind to the land.

For all trees. The stumps should be treated

For some of these methods it would depend where it was. I.E.-Around a footprint on a parcel vs in a creek.

Get rid of excess tree chip

Glad PID is involved with reducing and managing vegetation on the Ridge, I'm fully supportive.

Glad they are addressing this

Glad to see that you are NOT proposing defoliants/Herbicides One of your online maps show herbicide use at waters edge!!

Glad you're doing it!

Glad you will be managing the vegetation.

Go to it! Seriously its very appreciated by this household

Goats, goats, goats. So glad you are using grazing.

Goats leave 1/2 of the combustible brush

Goats provide great benefits with minimal impact

Good idea to do vegetation management. I can't believe it's taken this long in California to realize the necessity for this type of vegetation management. Good luck.

Good ideas, all that are necessary

Good Program- Fire safe Council Doing a great job

Good Work

Grazing and mastication captures carbon and benefits the soil. Mastication is a natural mulch which saves water... I think those 2 option are the best. And yes, the American Indians used fire to manage forests, but they didn't have viable options for grazing and mastication (which they would have opted for if they had the choice).

Grazing is outstanding, good for the ground and great for the community

Grazing would be best after step above in order of of sequence? Goats owner pay routine vet bills and not friend- relative of PID. (Pid pays for animal injury or replacement?)

Great Idea Make paradise more safe.

Great idea this will help all of us!

Great job- Keep it up!

Green very good

Habitat Loss

Hand crews are very expensive use equipment whenever possible

Help us out!

I am passionate about this. I think to also do control burns on empty lots around paradise small burns to clear out the thick brush. I am 100% for mastication- We need it! My dad was a fore captian when I was young he passed his knowledge to many people prevention is key.

I am pleased this is being done

I am pro grazing but I also realize it takes a while to accomplish and may not be the best answer in some instances. With that said, I think any and all brush reduction is needed as you (the professionals) deem necessary. Get it done and do it safely.

I appreciate PID is communicating like this with community

I bought my 1st home in paradise on Pentz RD had it for 9 months and it burnt to the ground. I was at work in chico.

I do not have vegetation

I don't necessarily see this as a role for PID, other than on PID owned property, but I appreciate the involvement And I'll take the help from whoever wants to give it.

I feel grazing leaves the root structure intact to prevent erosion of the soil

I have no doubt that you will do the best job!

I have spent \$\$\$ towards clearing however neighboring lots are uncleared. Please pressure these properties.

I like the goats eating the Vegetation best. Workcrews(like CCC workers & Parolees ETC) To clean the Vegetation

I like these ideas

I love goats!

I Love the grazing idea!

I thank PID for a good job! Keep it up Good work.

I think all of these methods are necessary, depending on the type of vegetation that needs to be removed and as long as the items involving fire are done on calm and controlled days.

I think all these are great ideas

I'm just afraid the goats might eat my peach tree. Otherwise, everything looks good!

I'm not opposed to herbicide usage if done in accordance with state and county regulations

I'm ok with any vegetation management. Hopefully homeowners insurance rates will go down

If you can't fund it year after year without raising our water rates it's of no use

In my experience, mastication practices result in the spreading of invasive plants.

Is this for unoccupied lots, properties, etc.? How about occupied?

It is important to be vigilant, vegetation grown back quickly

It needs to be done but should be managed in the least intrusive and natural way possible...burning is the least favorite but sometimes necessary and is a part of nature anyway.

It needs to be done. Find the most cost effective way that will provide the best results and Get 'er done!

It would be great if the dead snags and ground vegetation could be removed and reforestation could be initiated.

It's a good thing.

It's a gret idea!

Just do it!

JUST DO IT!!!

Just keep my house safe!

Just to start as soon as possible!  
 Keep on Keep'n on. Thank you  
 Keep up the good work  
 Keep up the good work!! Thank you!!  
 Keep up the work- / 50 years behind  
 Keep vegetation under control. Don't suppress every fire, smokey the bear was wrong.  
 Less fuel the better  
 Log it, Graze it or watch it burn  
 Look forward to a more aggressive control of vegetation  
 Love the goats-Good plan  
 Love the idea of goats. Come to Stirling City also!!! We need you!  
 Love this, please encourage other agencies and land owners to do the same.  
 Love to see more grazing  
 Make our town great again! Keep up on the vegetation removal/management.  
 Manage Vegetation, Don't destroy it, It is an important part of the watershed  
 Many Methods were used to try to prevent paradise before 2018-! Has any of these proof to stop a wild fire when conditions are bad?  
 Map of properties "bordering PID watershed" would be helpful! Don't know what area that covers  
 MASTICATION FOR THE WIN!!!  
 Maybe there is a ways to make a fire barrier on the eastside of paradise and Magalia to prevent fires from coming into the city.  
 Might make goats available for private property utility right of ways when grass & weeds start to dry out in summer  
 More Grazing  
 More property owners need to clean up their vacant land or they should be fined  
 More specifics on area to be managed  
 My lot does not have any structure right now  
 My wife wants to rent a goat..  
 Natural is best in my opinion  
 Need to maintain!!!  
 Need to start now before summer. All should be done in cool weather  
 No  
 No animal grazing on our watershed!  
 No need for customers opinions!! Just do it....Already had a devastation with the campfire...  
 No other comments  
 No prescribed fires please!  
 NO roadside (or any other area) spraying with pesticides.  
 No Thanks  
 No use of fire, please  
 No you are doing fine!  
 No, keep up the good work and thank you.  
 None  
 Not at this time  
 Not really sure if cut pile and burn how that will impact animal habitats.  
 Notification of burns and prescribed fires is nice. So we know that smoke is not a sign of a wild fire

Notify if doing several piles of burn- Do you handle watershed in coutelenc park? It is a mess of tangled ceinthus and dead brush. Fire danger for residents of laster lane- lines their only access route.

O.K

Offer volunteering opportunities

People need to be aware of prescribed fire occurring. My family is highly traumatized still! Putting fire and smoke in my community is not acceptable! Why stress people and upset them! People are afraid! Do not burn in Magalia or around it!

Plant more trees then plant more trees then plant more trees then plant some more. Tree help with erosion!!!

Plant Species of ground covers t6hat are indigenous to our area and reduce need for veg mgmt.

Please "ban the Burn" On the ridge. Didn't we see enough burn here on 11-8-2018

Please balance vegetation management with needs for habitat for plants and animals and erosion control. We want a healthy watershed.

Please clear as much vegetation as possible, thank you

PLEASE DO IT ASAP!!

Please do not burn- Clean air!!

Please just keep us fire safe. Thank you

Please no burning!

Please no chemicals

Please so everything possible so our community doesn't burn again.

Please tell me what your plan is? Cut dead trees, many trees all trees?

Prescribed burns are very smokey, we sometimes can't sleep at night. They sometimes get out of control.

Preserve the madrones!

Put pruners to work bad people ok. Also come to old peoples house to pull out weeds ok.

Remove all the burnt trees left standing after the fire

Remove all underbrush. Take out trees closer then 10 feet for forest health.

Right thing to do

Save lives

Save the trees/paper- No flyers or mail.

Says that Cut, pile & burning will cause Spontaneous combustion. WE THE PEOPLE ARE NOT BEING CONSIDERED OR TALKED TO

Seems to be going well

Sounds great. I just need notice so I can make sure the gate is open. I'm hoping the goats don't eat the peach tree, but I guess it can grow back. Thank you!

STAY ON IT!

Still some very dangerous trees around. There is one very close to our house. Have not been able to contact owners

Stop spraying poison.

Take as much as you can. A forest cleared of underbrush is a beautiful thing.

Thank you

Thank you for all of you efforts & hard work- I thing oyu are doing a GREAT job! Kudos to you!

Thank you for considering this!

Thank you for doing this vegetation management survey!

Thank you for doing your part!

Thank you for everything that PID does - Great group of employees & board members!

Thank you for finding ways to make our communities safer from wildfires.

Thank you for keeping the ridge safe!

Thank you for sending this survey!

Thank you for taking multiple steps to mitigate wildfires

Thank you we need it!

Thank you!

Thank you!

Thank you!!

Thanks for asking and for utilizing a broad range of treatments.

Thanks for being proactive.

Thanks for being proactive.

Thanks for the work you do, we appreciate you.

The goats are great! Keep up the great work!

The more the better. Glad to see them showing interest in making their property safer for the surrounding neighbors.

The only concern I have about prescribed fires or burning piles in the smoke! We've had enough of that!

The smoke is bad enough with all these idiots burning leaves all the time

The sooner the better

The USFS has proven that prescribed burns DESTROY habitat!! USFS has caused too much destruction and let fires get out of control.

There was no info about the different costs involved. This might've made a difference in my opinion on it.

Too many prescribed fires have gotten out of control

Try working in lower paradise!! On Skyway going into Chico!

Ultimately, I think we should do whatever works best for vegetation management and avoiding fire. Unless technology has changed mastication of the tree branches is just like your description "chews". Trees need to be provided with clean cuts. Not (CHEWED) this will only damage the trees in the long run.

Use a combination of methods appropriate to the situation

Vegetation removal- some must remain for the shelter for small animals and birds. Doves nest on the ground, so do quail.

Very important to remove underbrush and trim trees up and thin out for fire safety. THANK YOU!!

We appreciate your giving us the opportunity to provide feedback. Thank you.

We are on Sterns alongside dry creek

We are stewards of the land & should be as careful as possible to leave habitat for wildlife to feed & replenish our forest also needs wildlife to flourish

We don't need air pollution and don't want to breathe smoke

We have had enough of fires. Totally against burning.

We have poor air quality without adding more.

We liked the grazing on the dry creek area that was done 2022

What about planting to replace trees that were lost due to the fire?

where is the watershed, specifically? This is vague. Also you may get better response if you paid for postage

Why does it look like sh\*t everywhere? Y'all need to send out some kind of notice whenever you get a section done, so we can actually SEE the work that's been done. Because it's friggin' embarrassing to still live here in this shamble of a town! I mean Weaverville has had plenty of fires and they recover relatively quickly. Why can't we?

Why not cut, pile, & chip! We've had enough smoke with all the fires. No to burning of any kind- Check out what they did on 32 east out of chico some how they were able to chip.

Will this raise our PID costs to the customer

Would be nice if the town would follow-up on vacant lots, or lot s owned but not managed

You guys are awesome

You should not haw string any means to effective vegetation management. Different terrain will need different solutions.

You're doing a great job!

(blank)

Coordinate with butte county fire council

A map would have been nice with some definition of what lands fall within the PID watershed. I am assuming areas around Magalia Reservoir and Paradise Lake but more detail is preferable. I responded "no" for mastication and any use of fire but in actuality I think there may be conditions in which these might be the best choice. For example, mastication might be best for very thick stands of Himalayan blackberry or Scotch broom but should not be used broadly in native understory as it leads to soil compaction, could result in harm to wildlife and is a noise nuisance. Fire may be an appropriate tool at times but I believe should be used as a last resort as there's potential for fires to escape control, smoke and fires are triggering to many Camp Fire survivors, the smoke adds to our already generous exposure to carcinogens and poor air quality and may be harmful to sensitive groups. As a PhD in wildlife management and conservation I am also concerned about the protection of breeding wildlife and habitat during vegetation management activities, for example, cavity nesting and shrub nesting bird species and nesting Bald Eagles and Osprey at Paradise Lake. These protected species have special state and federal guidelines for any vegetation management in the vicinity of their breeding sites that should be followed by PID. Finally, I saw a map in the Magalia Community Center with PID vegetation treatments around Magalia reservoir that showed herbicide treatment right along the eastern edge of the reservoir. While this wasn't a treatment you asked about, I would like to state that I am against the use of any carcinogenic herbicide or use of herbicides directly adjacent to any water body as they often have impacts on aquatic wildlife as well as our human health.

The Trinity Alps and Yellowstone are good examples of not allowing wise timber harvest. This town did exactly the same thing. Then didn't allow watering. In my neighborhood we cut what we wanted and watered. We found out that everywhere we irrigated didn't burn! As a result, our house did not burn! This town burned because the town listened to specialist not the people. I'll manage my own property.

Depending on the exact area, a certain method would be better than others.

this is an excellent approach! Perhaps include a map of the watershed and PID boundaries. A watershed approach to natural resources management (Including Water) is a logical and effective way to manage vegetation water soil and wildlife habitat.

Funny about the goats- I suggested that long before the fire only to get dirty looks it fell on deaf ears & every excuse to not use them.

I feel the experts in vegetation management know the best method on a given area

Vegetation management should try to avoid native habitats to the extent feasible. Non-native vegetation should be targeted for removal.

Keep in mind that you are spending our money. All goods and services are paid for by the consumer or ta payers.

Smoke sends too many chemicals into our breathing air definitely no round up, shipping preferred

Be careful & do not leave excess

## Customer Service Activity Report - March 2024

Paradise Irrigation District

## Annual water system “flushing” is this spring

Paradise Irrigation District crews will work in each neighborhood this spring to “flush” the water distribution system. PID anticipates completing the system flushing, neighborhood by neighborhood, by the start of summer. Generally, the flushing will move south through neighborhoods, starting from the “top” northern part of the district. The effects of flushing will generally be noticed only in the immediate area being flushed.

Flushing removes oxidation from inside steel pipes; during flushing the water is forced through pipe sections under high-pressure creating a “scouring” action inside the pipes. The flushed water is released into the roadway ditch.

While the flushing doesn’t affect the safety of the water arriving in your home or business, the water may appear cloudy due to the increased air introduced into the system during flushing. You can see this by opening the tap and getting a glass of water; watch as the cloudiness disappears as the small air bubbles settle out.

PID crews will work to thoroughly flush the water mains but a small amount of residual material may remain until your home lines have cleared any discolored water. To more fully clear your home’s lines after your neighborhood lines are flushed, open an outside hose bibb or the bathtub tap and run about 80 to 100 gallons of water (one full bathtub) until the water appears clear.

You can view the flushing project’s status and the next neighborhoods planned for flushing at [PIDWater.com](http://PIDWater.com). Sign up for a weekly email at [PIDWater.com/flushing](http://PIDWater.com/flushing) updates to receive the latest flushing location updates in your inbox. PID office staff are unable to provide estimates of when they’ll be in your neighborhood—keeping an eye on the website and getting the email alerts is the best way to stay informed.

If you’ve installed a filtration system in your home, many in-home systems have a sediment filter that can cause low pressure or no water if flushing causes an issue. Please contact your filter provider for details about how PID system flushing may affect your home system.

This year’s system-wide flushing is the first since our community has had backflow devices installed at each service address. PID doesn’t anticipate the flushing process to cause any issues with the backflow devices, but if you notice water coming from the backflow after flushing, please call PID at 877-4971.

### Crews will work to minimize traffic impact

## Long-term project begins to replace water mains

Recovery from the Camp Fire continues with the replacement of main water lines throughout PID’s service area. The project’s first phase, which is anticipated to take about 20 months, updates the district’s aging piping infrastructure and provides more reliable service for our customers.

“We’ll replace the mains and then reconnect all current Active customer accounts and lots to the main lines,” explains District Engineer Blaine Allen. “We’ve contracted with outside crews for the project and are working closely with the Town of Paradise to coordinate and reduce traffic issues.”

Allen says the work will include lane closures and traffic control in some areas for a short time.

“Our goal is to limit the impact on traffic by not taking up entire roads but instead reducing traffic to one lane as needed,” he continues. “There may have to be a few road closures but we will work to keep it down to one-lane traffic whenever possible.”

Customers in affected areas may see service interruptions of up to a day while the mains are being replaced and service lines are reconnected. Those customers will be notified with a two-week notice and a follow-up

notice 48 hours before work begins. Notification will come from PID’s outside contractor (West Valley Construction) and may include a phone call, posting at your property (if vacant) or a door hanger.

NEXTDOOR

Agenda Page 57

***Fuel Management/BCFSC survey***

Compile intermediate and final results from SurveyMonkey.com. Review report. Finished.

***“Ridge Business Journal” (quarterly Chamber publication; late March publish date)***

Articles about PID and community “ownership” additional water storage with two new tanks; redundant water supply lines in Zone A; and overview of PID Demonstration Garden as a resource for planning spring plantings. Finished.

***Website: Rebuild***

Support staff in meetings, submissions and, eventually, training with CivicPlus for complete PIDWater.com website rebuild. Includes color, images and text suggestions. Predicted to launch in May. Ongoing.

***Facebook monitoring***

Watch, compile comments, share with staff (recent topics: salaries, cost of service). Ongoing.

***UPCOMING:******Video: “Your Backflow Device”***

To create story board for video explaining the what a backflow is and care--audience is PID customers.

***General: Mains project***

Use social media and email to tell area residents about upcoming “mains” projects beginning March 1; it will result in traffic control by crews and work on roads for an extended time. Emphasis will be on thanking community for understanding, promising to keep them updated and highlighting how this will benefit the community for years to come.

***Community Mailer (June)***

Coordinate with Treatment Plant staff for numbers for required Consumer Confidence Report; add in backflow education. To write, design, print, mail.

**STAFF REPORT  
FIELD OPERATIONS  
March 2024**

**TRANSMISSION & DISTRIBUTION**

**DAILY OPERATIONS**

- Our crews have been taking care of leaks, emergencies, and maintenance issues.
- 16 scheduled main line and service line leaks were repaired this month.
- Call Center received 43 after hour calls.
- Standby received 18 calls.
- 6 Emergency Calls / Infrastructure Damage Reports.

**SERVICE LINE REPLACEMENT / WATER REQUEST**

- 22 Fire Flow tests were performed.
- 0 Service line was replaced.

**CUSTOMER REIMBURSEMENT JOBS (by work order)**

- 0 Cash Jobs were completed, Due to weather.

**OVERVIEW**

- Continued efforts are being made with RCI and WWE to keep MISLER #3 project running smoothly and efficiently.
- Zone A Project- T&S completed the tie in to the new 16" pipeline in A-Zone.
- Daily coordination with West Valley to ensure the efficiency of the Mains Project.
- Coordinating with the Town of Paradise with their Paving Project and Hydrant Replacement Project.
- Interviews for the vacant Warehouse Position.
- System Flushing has started.
- Unregulated water was pushed into D-Zone, resulting in over pressurization.

**SUMMARY**

In A-Zone, on 3/14/24 PID assisted T&S with the completion of connecting the newly installed 16" main to the existing 12". This included draining, refilling and testing the existing portion of main

We have received approximately 75 applications for the vacant Warehouse Position. We have gone through all applications and conducted interviews. We will make our selection in the beginning of April.

On 03/04/24 we started our system wide flushing program. Our crews will move systematically through town from the top to the bottom to clear out every main in our Distribution System. We estimate this should take us approximately five weeks to complete.

On 03/21/24, at approximately 0645 PID was notified about an abnormal pressure spike in the Valley View area. After investigating numerous options, Kurtis Brey inspected the Pressure Reducing Valve in that area and determined there was a failure in the Pilot Control, resulting in unregulated water flowing into D-Zone. This issue was identified and resolved by approximately 1200pm.

In this timeframe, the over pressurization affected approximately 170 customers. The PID Customer Service was quick to notify and inform all customers affected. This also resulted in approximately six customer claims to be filed for various reasons.

## **MAINTENANCE PROJECTS**

- Continued efforts are being made to coordinate work schedules and bids with contractors regarding:
  - Digital Sign Board
  - Both rental buildings on Clark Rd
  - Fixing and improving the lighting in the parking lots of the Admin Building and at the Corp Yard.
- General yard maintenance at Corp Yard and Admin Office.
- Continuing to assist and support the field crews as needed.
- Starting the process to replace and/or repair fencing on all PID properties.
- Preparing RFP for resealing and striping both parking lots at the Admin building.

## **DISTRIBUTION SYSTEM OPERATOR PROJECTS**

- Overseeing and organizing the system wide flushing program.
- Tank site maintenance, including vegetation management.
- Flushing dead end mains.
- Continuing with Fire Flows.
- Continuing to assist and support the field crews as needed.
- Taking Bacti Tests as needed.
- Vault maintenance and repair.

## **METER SHOP**

- 15 Backflows installed.
- 230 Backflow tests completed.
- 1,320 USA tickets completed.
- Congratulations to Aaron Ropp for obtaining his Backflow Testing Certificate
- Welcome Michael Bray to our team. He has accepted the open Meter Shop Serviceperson position.
- Continued efforts are being made to stay ahead of USA tickets as well as training all Meter Shop personnel to locate.
- Continuing to test backflows as well as train our new Serviceperson to prepare for state testing for tester certification.

STAFF REPORT

WATER TREATMENT PLANT

March 2024

**WATER TREATMENT**

- Production at the District’s treatment plant for the month of March varied between 2.0 and 3.4 mgd, with the average day being 2.6 mgd.
  - Compared to:

	<u>pre-fire Mar. 2018</u>	<u>Mar. 2020</u>	<u>Mar. 2021</u>	<u>Mar. 2022</u>	<u>Mar. 2023</u>
<b>Low</b>	1.8	1.5	1.5	2.0	1.5
<b>High</b>	2.5	3.1	2.7	3.4	3.6
<b>Avg.</b>	2.2	2.1	2.0	2.6	2.3

- Completed required monthly/quarterly reporting to Department of Drinking Water and Regional Water Control Board.

**Treatment Plant**

- The Electronic Annual Reporting (eAR) was submitted to The State Water Resources Board Division of Drinking Water for the reporting year of 2023.
- The Pump station project at the treatment plant continues to make progress.
- We are working closely with the contractors on the SCADA system for the new pump station so it can be smoothly integrated in with our current system.
- Preparations are being made and supplies collected to improve runoff drainage at the dams.
- Operators are anticipating the flow demands required for the system flushing project.

**MAGALIA/PARADISE DAMS**

- Monthly monitoring of piezometers at Magalia and Paradise dams was performed.
- Paradise is read every other week due to being full.
- Magalia release is open to control excess water.

**WATER QUALITY – DISTRIBUTION SYSTEM**

- Routine Sampling – 4 Bacteriological samples are taken each week at locations throughout the Distribution system. They are analyzed for Total Coliforms, Fecal Coliform & E. Coli. These samples verify the potability of the water in the system.

**March 2024, WATER QUALITY**

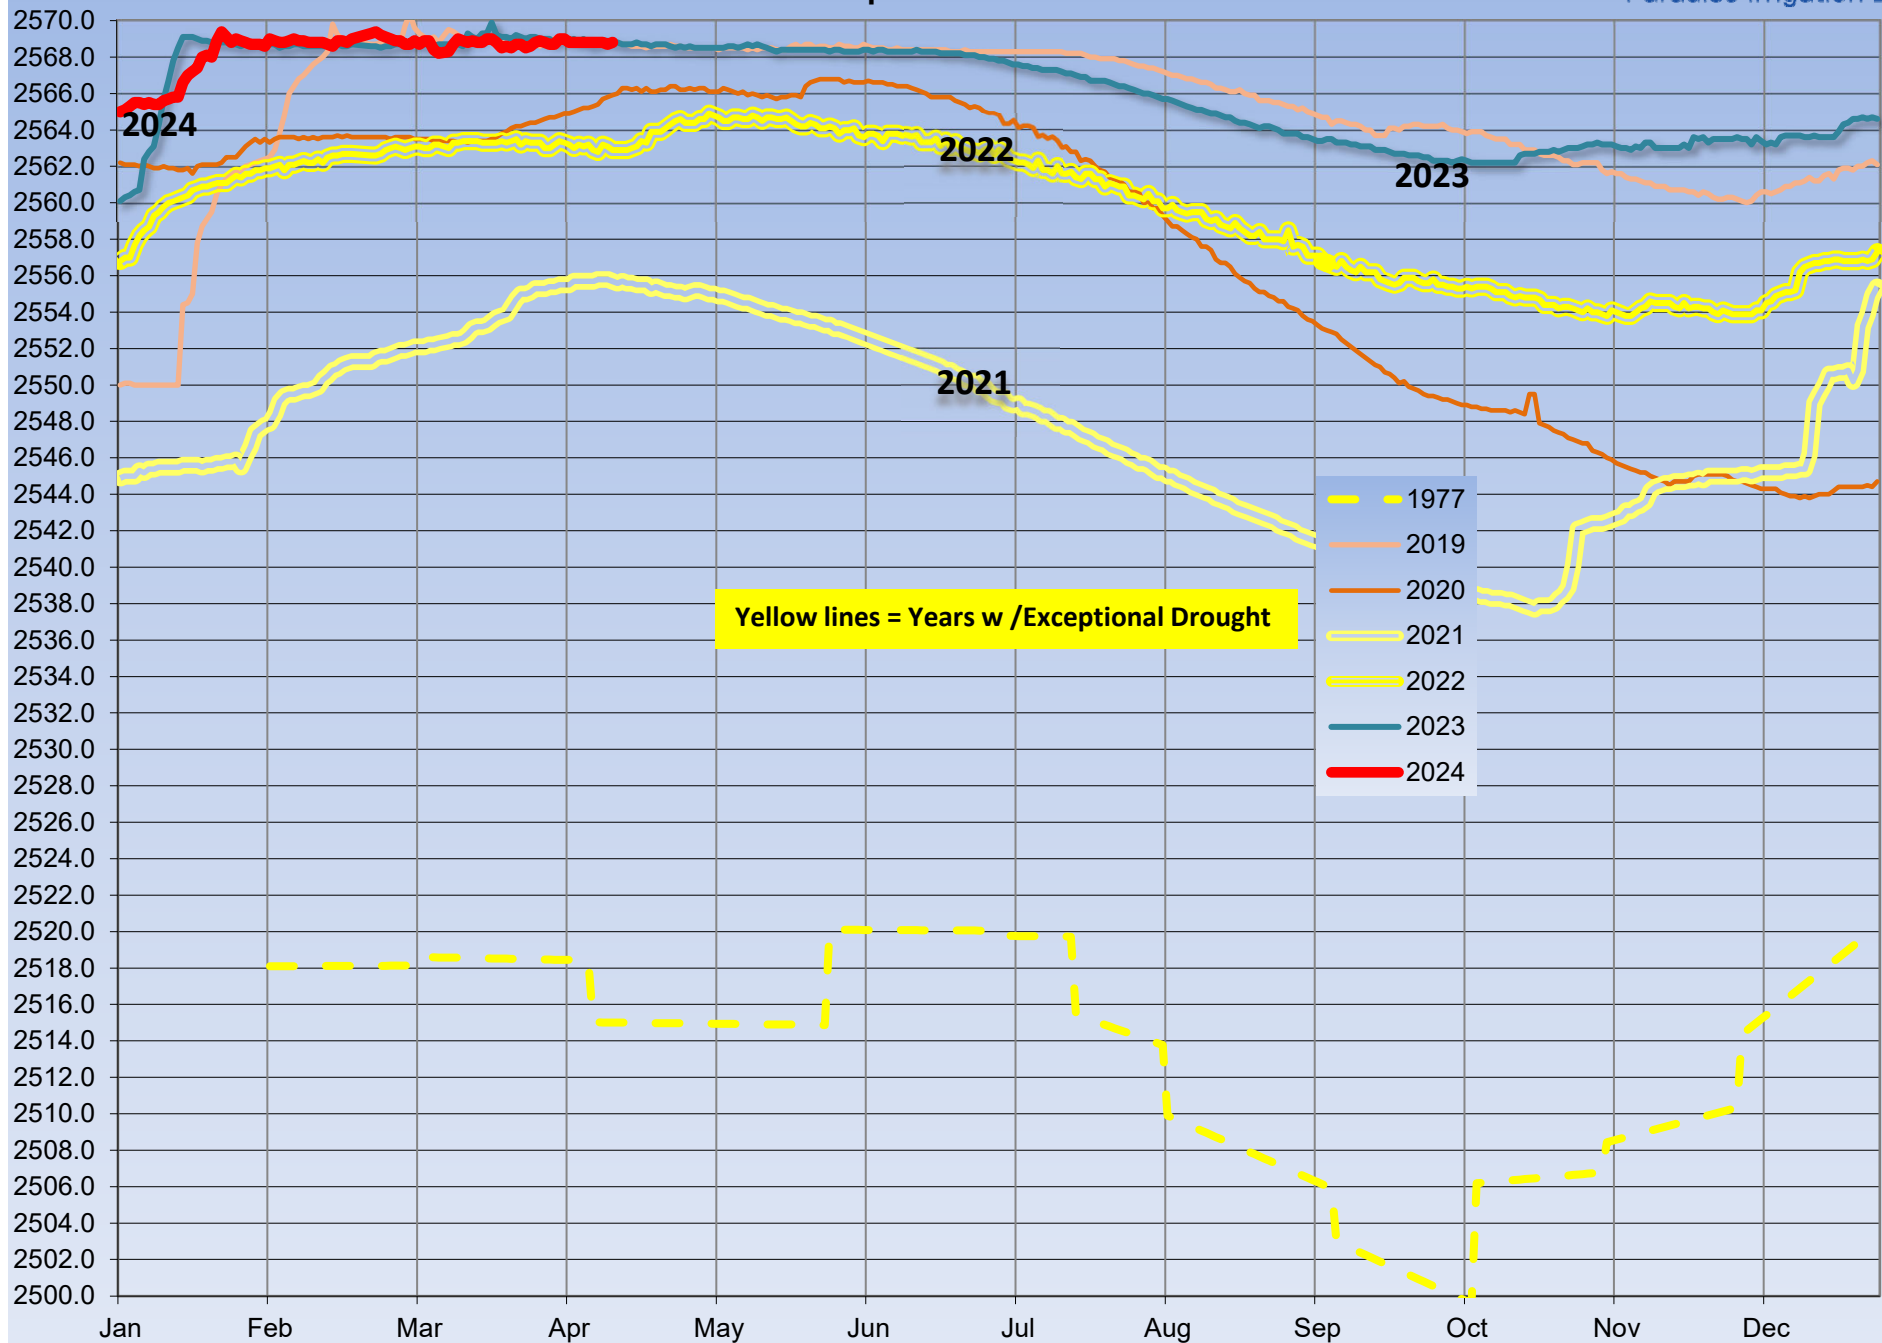

- Average daily production: 2.6 mgd
- Average effluent turbidity: 0.04 ntu
- Average raw water turbidity: 1.0 ntu

**Water Levels (as of 3/31/2024)**

- Magalia Reservoir 2193.8'
- Paradise Lake +0.7'                      +1.1' same day in 2023
- Percentage of Water in Storage 99% of Total Available
- Rainfall for 2023/2024 rainfall year:

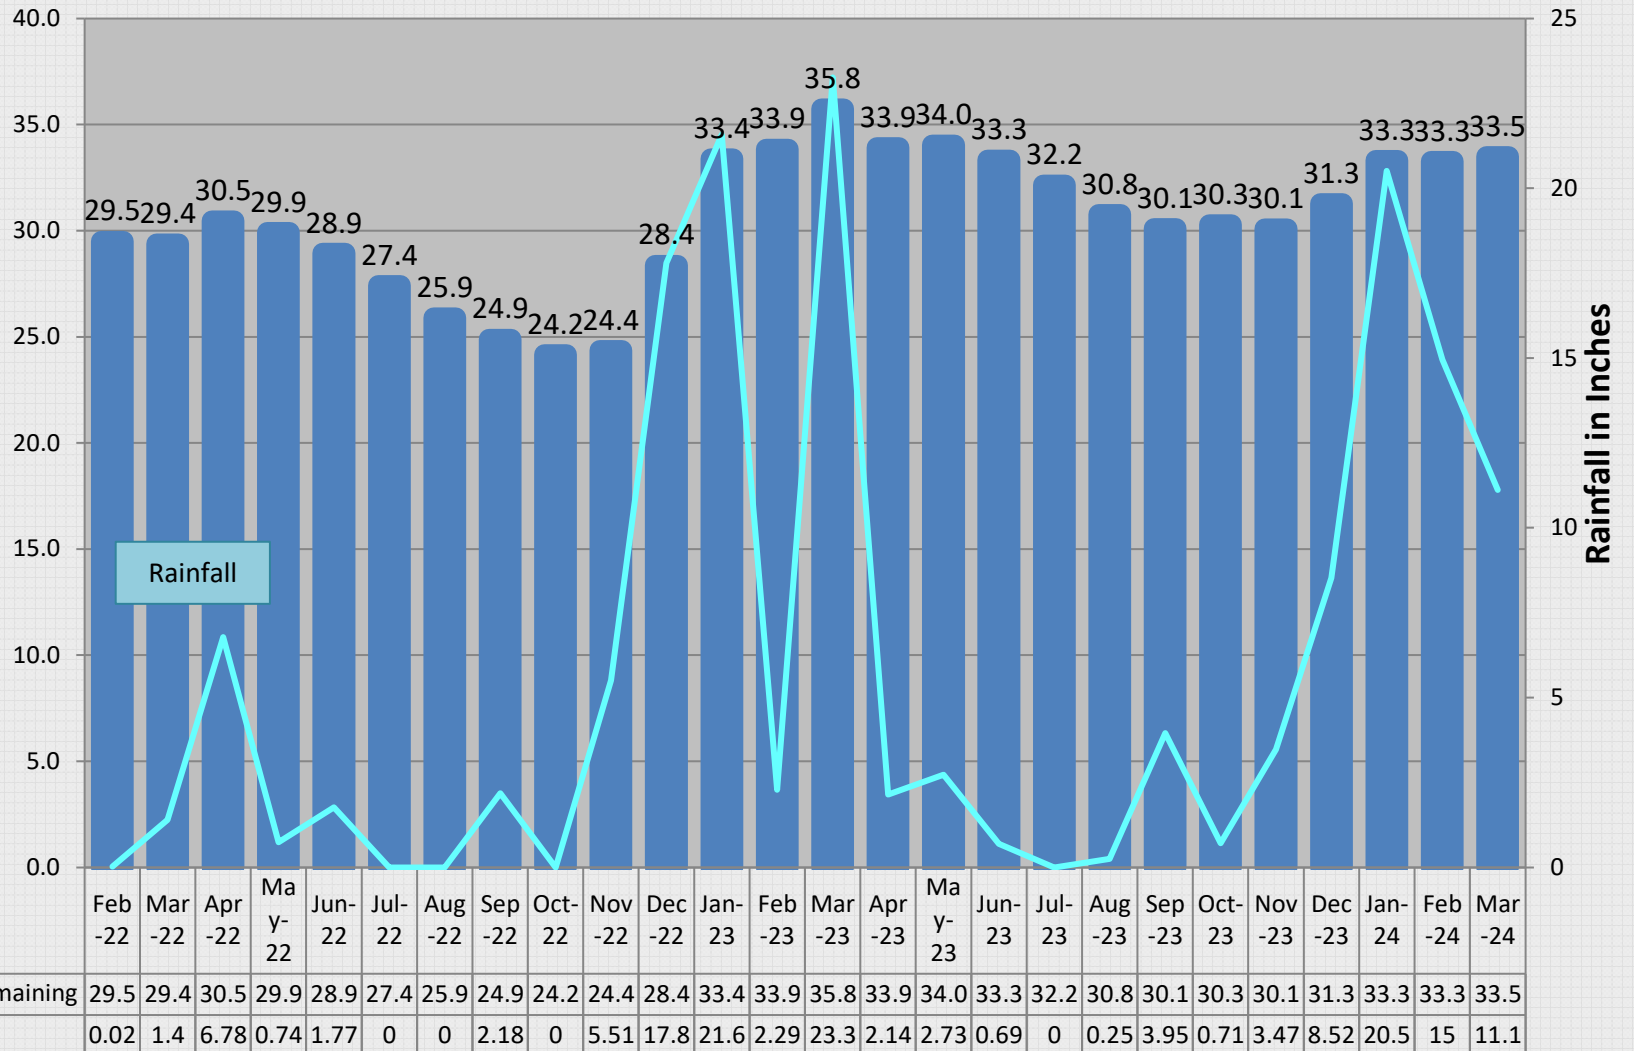

▪ October	<b>Magalia Res.</b> 0.84"	<b>Paradise Lake</b> 1.03"
▪ November	3.47"	4.02"
▪ December	8.52"	9.73"
▪ January	18.69"	17.61"
▪ February	14.00"	16.75"
▪ March	11.1"	12.61"
▪ April		
▪ May		
▪ June		
▪ July		
▪ August		
▪ September		
Total for 2023/2024 Rain Year	42.62"	45.00"
Average Rainfall	64.00"	65.20"

Paradise Lake Elevation  
04/8/2024  
Spill = 2568.1

# Months of Supply Remaining on the First of the Month with No Future Rain Based on 2020/21 Use

Full Reservoir Supply is 33.84 Months of Supply Remaining.

4-8-24

**District Engineering Department Update for the Board of Directors**

1. Working with customers and providing estimates to provide new water meter services to multiple locations throughout town.
2. Coordinated with Water Works on MISLR 3 and other projects.
3. Working with Slate Geotechnical Consultants for Magalia Dam 100% design. The Design has continued after meeting with FEMA, boring appears to be planned for the May/June timeframe due to driller availability and permit requirements.
4. Zone A pipeline is progressing nicely, they are currently working at the treatment plant on the new pump house, they have fully connected the distribution line and poured the footings for the pump house.
5. Monthly water reporting is continuously being completed.
6. Working with the Town of Paradise as they complete the 2024 On-system road paving that is to be completed in 2024, RCI is working on installing laterals before the paving begins. We completed all the 2023 off-system roads that are being paved in spring 2024.
7. Mains project is progressing nicely. Xeno and Judy are complete with multiple other mains to be completed in the next couple of weeks. Once these are completed the contractors sub will come back and do pavement patch work.
8. MISLR phase 3 work is completing service laterals with 4 crews, 1 dedicated to building permits and priorities and the other 3 are focused on roads the Town has on their list to be paved in 2024. With the rainy season work has been mostly delayed. We are currently looking into having RCI add an additional crew to stay ahead of the Town's paving project, this crew will begin work once weather has cleared.
9. RFP for Gabion Wall construction has been put out and the apparent low bidder will be presented the board at this month's meeting.
10. Work on other RFP's including EQ tank project management, rental property updates, and tank recoating are in the process of being prepared to be published.
11. Final Design of Equalizer Tank is under review and expected to be completed in the next month.
12. Working with Town's contractor reviewing fire hydrants to be repaired with a grant they received.

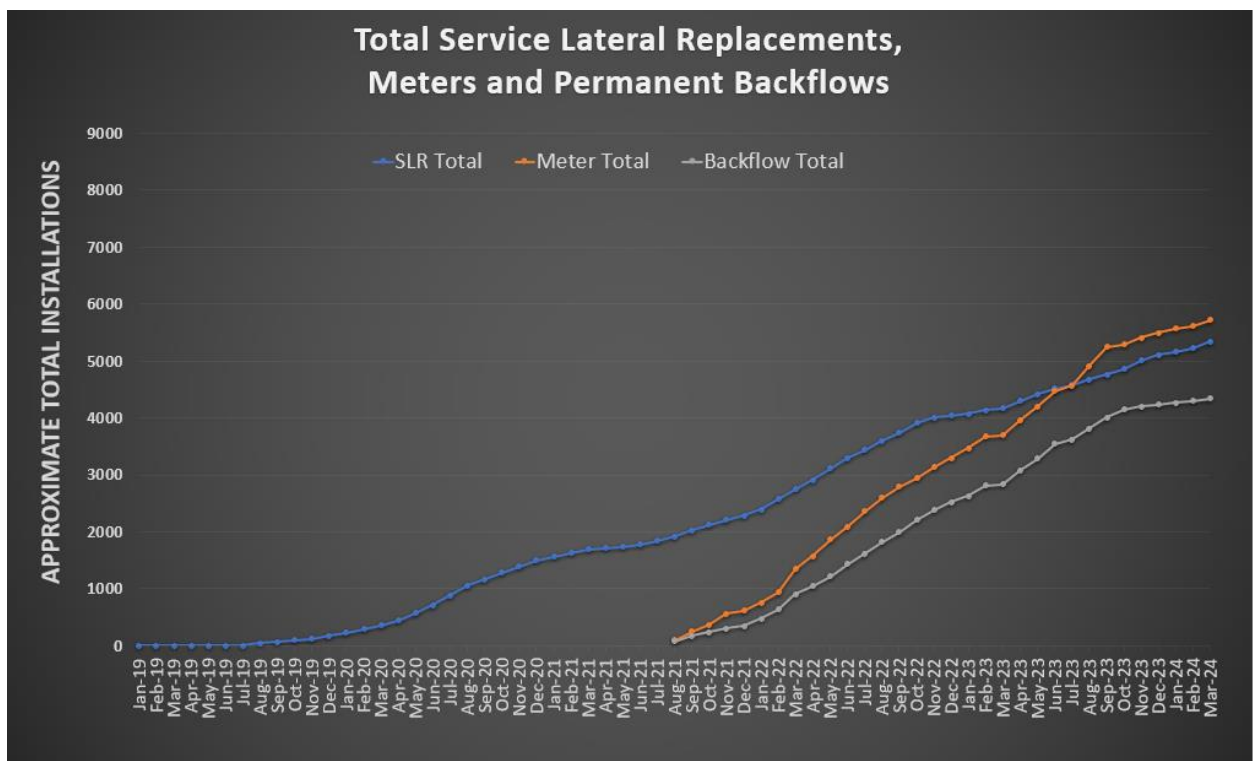

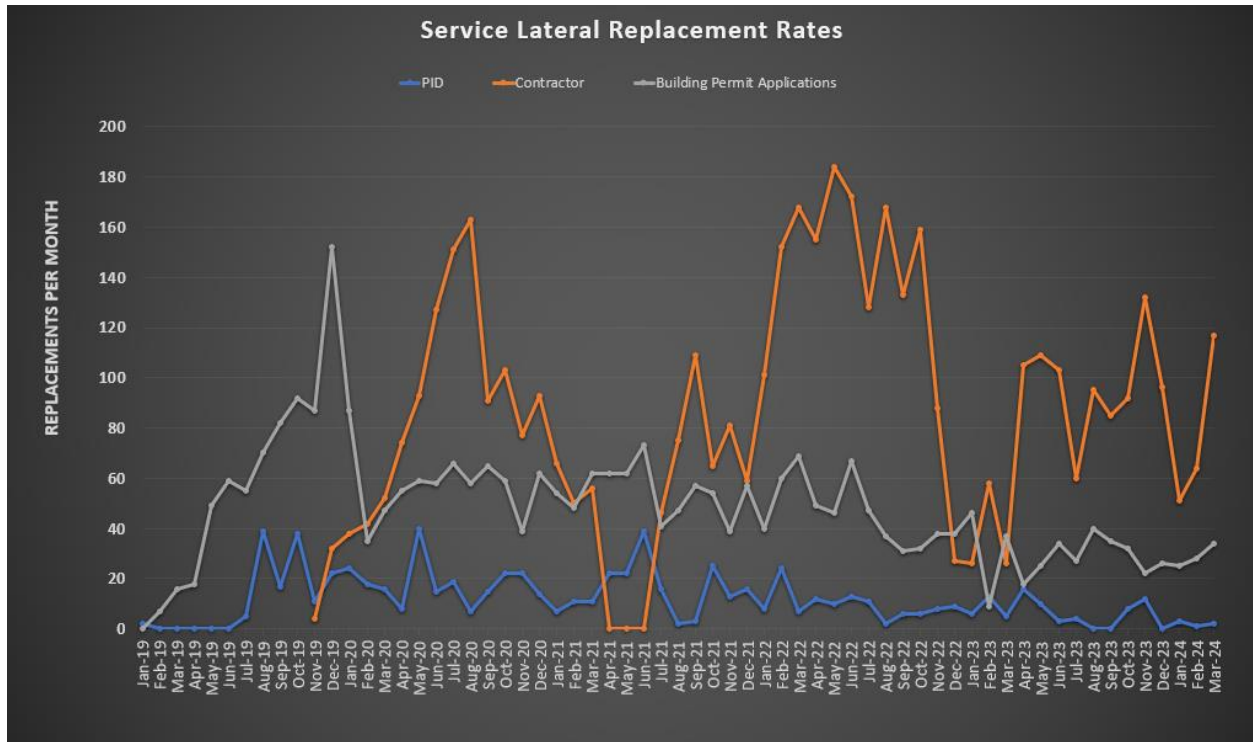

## Meter Installation and Service Lateral Replacement Program

- In March the MISLR 3 Project installed the following quantities, impacted by some down time for intermittent weather primarily early in the month:
  - 117 service laterals,
  - 100 meters
  - and 51 backflows
- Focus continues to be on 2024 paving priorities for the Town of Paradise project to stay ahead of their work. Continuous coordination with the Town is a priority and data is supplied to support that coordination on a regular interval.
- Additional priority installations to support building permits and urgent requests for water.
- New permit applications at the Town of Paradise came up a bit to 34/month in March although we are seeing a faster approval of submitted permits. These are being incorporated into RCI's workflow with a target of 4 weeks from assignment, weather permitting.
- Work ongoing with PID staff to rectify all active meter/MIU installation records and ensure that this final project phase is a clean sweep of remaining installs.

# Water Supply Recovery Program Update

# Water Supply Recovery Program Update

## Main Replacement Project

- Work on the Mains Replacement Project Phase 1 is underway and has continued at a fast pace throughout the month of March.
- 6 new main tie-ins completed to date as of this week, most recently with Farber and Linry.
- Upcoming is the replacement of the A-Zone-1 segment along Cabernet and part of Gate Ln, tying into Clark Road.
- Of note in coming weeks the project will complete the A-Zone-3 segment, tying into the recently installed Zone A pipeline at Skyway.
- West Valley working with Water Works and PID to coordinate main shutdowns as needed.
- West Valley working with the Town of Paradise to coordinate traffic control as needed.
- Several change order request have been initiated by West Valley as they identify unknown field conditons underground. Each request is being analyzed against contract requirements by Water Works and then PID staff to identify necessary costs and minimize future ones.

## Henson Road Culvert Replacement

- Scope and cost in review by PID staff to determine a path forward for the project.

## Reservoir B Replacement Project

- The project has been recommended for completion by WWE.
  - SCADA program – outstanding issues have been resolved
  - As-built documents are finalized and project files have been transferred to PID
  - RFC 25 – Slab Crack Repair – discussions ongoing with Myers & Sons to resolve this issue
  - Landscape – Maintenance period has expired and final site acceptance walk has occurred.

# Water Supply Recovery Program Update

## Zone A Pump Station and Transmission Main Project

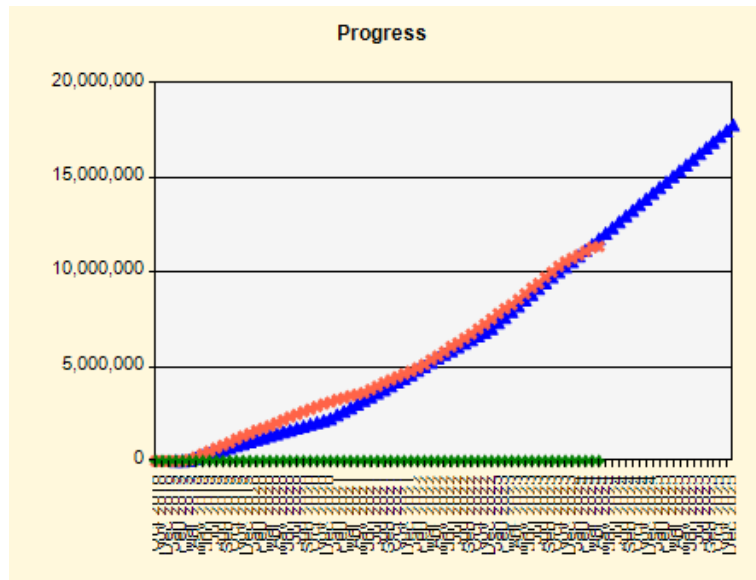

- The pipeline has passed the pressure test and will be chlorinated for tie into the Mains project in the coming weeks. The pump station startup is expected at the end of 2024.
- The pump station building footing is mostly complete. The under slab installation of the building drains and electrical conduits is underway. The building foundation work will be completed in April, and the above grade building erection will begin in May.

# Water Supply Recovery Program Update

## Program Management Budget

- Billing in the last month has been slightly lighter than expected with weather impacts.
- Work is within expected budget this month and on schedule.

APRIL 17, 2024

## Post-Fire Recovery Update

### FEMA Public Assistance (PA) – DR-4407 (Camp Fire Major Disaster Declaration)

The FEMA PA Program provides reimbursements for costs incurred while responding to and recovering from a Presidentially declared major disaster. For this event, the federal cost share was 90% on Emergency Work projects (Categories A-B) and 75% on Permanent Work projects (Categories C-G). CalOES covers 75% of the remaining local cost share, so they pay 7.5% and 18.75% respectively. This typically leaves PID with 2.5% and 6.25% respectively.

For this event, PID was able to claim donated resources and offset the entire local cost share on the emergency work projects. In addition, some of the funding from the Drinking Water State Revolving Fund (DWSRF) is offsetting the local cost share on the major PWs for repairing the water system as well as the replacement Reservoir B when FEMA denied the mitigation proposal. With all funding combined, PID is now only paying a local cost share on recovery-related projects of approximately 0.3%.

Upcoming priorities and recent developments include:

- **Financial Dashboard Development** – Data processing and configuration is ongoing.
- **FEMA BRIC grant for Magalia Dam Seismic Retrofit** – A decision from FEMA is anticipated in August/September.
- **New FEMA Declaration – DR-4769 Storms** – The President declared DR-4769 on Saturday, April 13. Working with staff to submit an RPA (Request for Public Assistance), develop list of damages and group into eligible projects. This also means we can begin strategizing for the HMGP funding that stems from this declaration.
- **Reimbursement Requests** – Currently gathering supporting contract/task order/change order documentation for the next round of reimbursement requests.

Following are status summaries for each project awarded by FEMA under Public Assistance:

#### PW 3 GP 72826 B Emergency Response/Protective Measus

Obligated:	\$ 1,654,810.97
Fed Share:	\$ 1,489,329.88
State Share:	\$ 124,110.82
Received:	\$ 1,637,185.00
Pending:	\$ 23,744.30

Project is in closeout with CalOES. Overpayment will be addressed at closeout.

**PW 15      GP 84775      Z      PID Management Costs**

Obligated:	\$ 68,779.00
Fed Share:	\$ 68,779.00
Pending Amend:	\$ 4,105,052.56
Received:	\$ 0.00
Pending:	\$ 4,105,052.56

Project 84775/PW 15 was obligated when PID only had PW 3 obligated at \$1,375,597.87, leading to PW 15 having a total value of 5% of that amount or \$68,779.89. Since then, PID has had an additional 12 obligations for a total of \$82,101,045.19, resulting in a need for an amendment to add 5% of that value, or \$4,105,052.26. Amendment was requested on 4/18/22.

**PW 33      GP 84011      A      Arborist**

Obligated:	\$ 10,210.00
Fed Share:	\$ 9,189.00
State Share:	\$ 765.75
Received:	\$ 9,955.00
Pending:	\$ 0.00

Project will be closed out when the last small project is closed out.

**PW 138      GP 90006      F      Water Storage Tanks and Supporting Systems**

Obligated:	\$ 0.00
Fed Share:	\$ 0.00
State Share:	\$ 0.00
Received:	\$ 0.00
Pending:	\$ 0.00

Project was written as a placeholder for potential damages to tanks and associated systems. None were found, and if any had been found, insurance would have covered it and the deductible is on the equipment/vehicles PW.

**PW 221      GP 94422      G      District-wide Fencing**

Obligated:	\$ 100,000.00
Fed Share:	\$ 75,000.00
State Share:	\$ 18,750.00
Received:	\$ 93,750.00
Pending:	\$ 0.00

Project was initially written for \$578,655.00 with an insurance reduction of \$478,655.00, have received all funding from FEMA and CalOES. Project is pending completion of Reservoir B, so all damaged funding can be completed under one project. Project can then be closed out upon completion of all small projects.

**PW 238      GP 94415      C      Road Damage Caused by Fire (Henson Road Culvert)**

Obligated:	\$ 134,173.00
Fed Share:	\$ 100,629.75
State Share:	\$ 25,157.44
Received:	\$ 2,516.00
Pending:	\$ 123,271.19

Project was written for repair costs of \$84,263.00 and 406 mitigation costs of \$49,910.00 to armor the culvert openings with rock. PID has reassigned this to Water Works, and the RFP was issued for the design of the project.

**PW 257      GP 84049      B      Contaminant Testing by PID**

Obligated:	\$ 1,781,833.70
Fed Share:	\$ 1,603,650.33
State Share:	\$ 133,637.53
Received:	\$ 1,576,922.00
Pending:	\$ 160,365.86

Most of project funds have been received due to the project being complete at the time of obligation. Remainder (10% of fed share) will be held against closeout of the disaster. We have submitted documentation, both for corrections and additional costs, for a net increase of \$530,892.56.

**PW 265      GP 96404      E      Vehicles, Equipment and Buildings**

Obligated:	\$ 35,942.32
Fed Share:	\$ 26,956.74
State Share:	\$ 6,739.19
Received:	\$ 33,695.00
Pending:	\$ 0.00

Project was written for \$883,769.59, with a reduction for anticipated insurance proceeds of \$847,827.27. Has been fully paid as a small project. PID staff are working through the list of minor repairs and purchases that need to be made to complete this project. APTIM's Meera Narayanan-Pandit is continuing to work with PID staff in reconciling the project to date.

**PW 321      GP 76334      F      Reservoir B**

Obligated:	\$ 347,704.00
Fed Share:	\$ 260,778.00
State Share:	\$ 65,194.50
Received:	\$ 0.00
Pending:	\$ 325,972.50

Project was written for replacement of Reservoir B in its pre-disaster form with cover and liner. FEMA rejected 406 mitigation proposal to replace with steel tanks. DWSRF is funding the full project, so FEMA funds aren't needed here.

**PW 326 GP 91767 Donated Resources**

Obligated:	\$ 382,983.85
Fed Share:	\$ 344,685.47
State Share:	\$ 28,723.79
Received:	\$ 376,281.00
Pending:	\$ 2,871.74

FEMA allows donated resources projects as a way to offset the local cost share. PID received \$1,090,910.05 in donated water, but the obligation is limited to the amount that will result in matching PID's local share on other Category A and B projects. Unsure why the CalOES' payments resulted in an overpayment – this can be resolved at disaster closeout.

**PW 328 GP 94420 D Paradise and Magalia Dam Burn Damage**

Obligated:	\$ 35,631.32
Fed Share:	\$ 26,723.42
State Share:	\$ 6,680.85
Received:	\$ 33,404.00
Pending:	\$ 0.00

Project was written for minor repairs to the surface of Magalia Dam as well as damage to the conveyance pipe between the dam and WTP. Project referenced Paradise Dam as a placeholder, but no damage was observed. As a small project, this has been completed, but the scope of work will need to be completed before closing all small projects.

**PW 332 GP 94494 F Meters, Meter Boxes and AMI System**

Obligated:	\$ 2,087,334.00
Fed Share:	\$ 1,565,500.50
State Share:	\$ 391,375.00
Received:	\$ 39,138.00
Pending:	\$ 1,917,737.50

Project was written for replacement of meters, meter boxes and the automated meter reading system, with a 406 mitigation proposal to replace plastic meters and boxes with brass meters and concrete boxes. Initial reimbursement requests are on hold pending further insurance information.

**PW 333 GP 94496 F Service Laterals**

Obligated:	\$ 42,793,182.00
Fed Share:	\$ 32,094,886.50
State Share:	\$ 8,023,721.62
Received:	\$ 12,109,487.00
Requested:	\$ 0.00
Pending:	\$ 28,009,121.00

Project was written for testing and replacement of the rest of the FEMA-eligible service laterals, after PW 355 covered the initial phase of service lateral replacements from the Sutton contract. This project includes a 406 mitigation proposal for backflows for the quantity of laterals granted (the remainder of backflows are covered on project 349). This project includes the latter half of the Sutton contract and the RCI contract. An improved project is being formulated to shift testing costs into replacing more laterals. Initial RFR submitted 1/18/23, reimbursement received 3/4/24

**PW 349      GP 130152      F      Water Mains**

Obligated:	\$ 29,873,110.00
Fed Share:	\$ 22,404,832.50
State Share:	\$ 5,601,208.12
Received:	\$ 560,120.00
Pending:	\$ 27,445,920.62

Project was written for replacement of mains determined to be damaged by testing, as well as a 406 mitigation proposal for the remainder of backflows. This project is only recently started and initial reimbursement requests will be formulated soon.

**PW 355      GP 130189      F      Initial Service Laterals (pre-FEMA-428 Program)**

Obligated:	\$ 4,587,432.00
Fed Share:	\$ 3,440,574.00
State Share:	\$ 860,144.00
Received:	\$ 4,386,732.00
Pending:	\$ 86,014.00

Project was written for the initial phase of service lateral replacements from the Sutton contract. FEMA's titling of the project as "completed outside of 428" led to confusion of CalOES and early payment of funds – notified CalOES of the issue and they decided not to pursue correction of the issue since the work had already been completed. Working on resolving the Sutton change orders to get ready for project closeout – the increase in eligible costs will be submitted at closeout for extra reimbursement, which is expected to surpass the amount of CalOES' overpayment. Sutton issues appear to be resolved and we will file for reimbursement as soon as final payment is processed.

## FEMA Hazard Mitigation Grant Program (HMGP)

The FEMA Hazard Mitigation Grant Program is a competitive grant program tied to major disaster declarations. The program provides mitigation opportunities for facilities that were not damaged by the event, but that could be hardened against or protected from a similar type of event.

For the DR-4407 (2018 Camp Fire) HMGP cycle, PID submitted four applications. One application was allowed to partially move forward as an Advance Assistance HMGP grant, for the study and design of the options to restore Magalia Dam. For the DR-4344 (2017 Wildfires) HMGP cycle, PID had submitted an application for a generator at the WTP, as well as pipeline and pump stations improvements. This grant was suddenly revived in early 2022, and we just received the formal award notice this month.

### DR-4344-PJ0619

### Paradise Water Supply Hazard Mitigation Project

Awarded:	\$ 6,259,315.00
Federal Share:	\$ 4,694,486.25
PID Share:	\$ 1,564,828.75
Requested:	\$ 2,981,803.94
Received:	\$ 1,490,909.00
Pending:	\$ 4,694,486.25

This grant (applied for before the Camp Fire) was awarded in September 2022, for a new generator at the WTP, plus pipeline and pump station upgrades for Zone A. This is also known as the ZAPS Project. PID staff are working to review/revise the 5-year-old cost estimates to determine if a budget increase request is needed. The RFPs for this scope have been reviewed for FEMA compliance, and we have located the HUD terms and conditions to add as well.

### DR-4407-PJ0278

### Advance Assistance – Magalia Dam Study and Design

Awarded:	\$ 1,610,575.00
Budget Increase:	\$ 916,602.58
Total Expected:	\$ 2,527,177.58
Federal Share:	\$ 1,617,416.23
PID Share:	\$ 909,761.35
Requested:	\$ 1,003,044.88
Received:	\$ 667,693.00
Remaining:	\$ 1,266,790.71

The study phase of this grant was completed in early 2022. PID has received an extension to the period of performance and requested a budget increase approval from FEMA. We've been informed that the available bucket of funding is smaller but that PID may request the full amount remaining, and have revised our request to do so. The design contract was approved, so that design may be accomplished in time to apply for the 2023 BRIC funding cycle. CalOES has asked that coring sample work be stopped at the request of FEMA. The REC was approved by FEMA and Slate is moving forward with their geotechnical work. With approval of the REC, the budget increase should move forward soon.

**Expect the Extraordinary.**

## California Drinking Water State Revolving Fund (DWSRF)

The California DWSRF has awarded funding to PID, through a mixture of ASADRA and other funding sources, to accomplish the following tasks:

- Fund the Almond Street project (completed)
- Fund the replacement of Reservoir B (begun)
- Fund the local cost share of FEMA PA PWs related to the recovery of the water system (PWs 332, 333, 349 and 355)

We are working to pull all the documentation and develop a management plan that meets requirements for reporting, reimbursement, and any scope or schedule changes. We are also looking to pursue additional DWSRF grants to fund the added cost of rock removal at Reservoir B. We met with Bow Reilly at DWSRF, who confirmed that additional funding is available and can be requested to cover cost increases. A reimbursement for the available amount of DWSRF funding was submitted at the end of March. DWSRF and Brett requested and processed an amendment to add \$5M of available excess funding to the grant – this should address cost increases since the FEMA PWs were initially obligated.

**We will be submitting reimbursement requests for the same time periods that we request FEMA reimbursements, to keep the matching costs cleaner.**

## HUD Community Development Block Grants (CDBG-DR, -MIT)

California Department of Housing and Community Development (HCD) released the allocations for CDBG-Disaster Recovery (CDBG-DR) in August 2022. Of the \$14M we submitted in requests, we are received an allocation of approximately \$3.25M. One project (the portable water treatment truck) was ruled ineligible. Several projects contained scope elements that are in the newly awarded HMGP grant, so those will be included with the Magalia Dam HMGP grant in our submission to CDBG-MIT for FEMA HMGP Match.

We met with the Town of Paradise and HCD on Wednesday 11/16/22 to discuss how information and financials will flow between PID, the Town (as the main applicant) and HCD. As of that meeting, the Town and HCD had not finalized their agreement, and our next steps are based on the finalization of that documentation, which is not expected until early next year. We met with HCD on 1/17/23 to discuss the form to prove Urgent Need and contract requirements (David-Bacon, Section 3, etc) for work we plan to fund through CDBG-DR and CDBG-MIT. On 2/13/23, the Town indicated they still hadn't seen an MSA to review. On 7/5/23, the requested CDBG Project Descriptions have been provided to the Town. **Final paperwork has been received regarding the subagreement with the Town, and we are now waiting on HCD to finalize and approve the tank relining project.**

## FEMA Building Resilient Infrastructure and Communities (BRIC)

The BRC NOI was submitted August 18, 2023. We completed and submitted the 2023 BRIC application to CalOES on December 13. CalOES issued RFIs on December 19-20, and we submitted our responses on January 5, 2024. We fulfilled a smaller RFI on February 12, and final inundation documentation on February 24. CalOES approved the Application and it was sent to FEMA before the February 29 deadline. We received seven letters of support, from Congressman Doug LaMalfa, Butte County Department of Public Works, Butte County Fire Safe Council, Paradise Ridge Chamber of Commerce, Paradise Unified School District, Rebuild Paradise Foundation, and the Upper Ridge Community Council.

**Expect the Extraordinary.**

# Paradise Irrigation District

6332 Clark Rd, Paradise, CA 95969 · 530-877-4971 · Fax: 530-876-0483 · [www.pidwater.com](http://www.pidwater.com)

DATE: April 10, 2024  
TO: Board of Directors  
FROM: Blaine Allen, District Engineer  
RE: Customer Request for Consideration – Relocation of Water Main at  
5075 Eden Road – APN 055-170-020-000  
4/17/24 Board of Directors Regular Meeting

Paradise Irrigation District received a letter addressed to the Board of Directors on March 18, 2024, from Renee and Benjamin Moore seeking assistance from the District to relocate a main that runs through their property located at 5075 Eden Road in Paradise. This communication was presented with the complete agenda packet for the March Board of Directors Meeting and recommended for discussion at a future meeting.

The following is a summary of options for replacement of the water main:

The main running near Eden Road is known as a backyard main as it runs through multiple properties instead of along a roadway. In 2007, part of this main was replaced and a “future” connection was installed to continue the upgrade in the future. The portion replaced is north of said property. Currently, PID has an easement running through the properties as that was how it was installed and then granted over to PID. The older portion of the main is two inches or smaller and serves eight properties; where presently, we try to have five or less properties off this size of main.

It would be my recommendation that PID obtain the easements to run a new main (1300 ft) down Eden Road. **(Option 1)**. This would make it easier to access repairs for the future and abandon from the backyards of PID customers. A very rough estimate to do this is about \$450,000 to \$550,000, not including the cost of obtaining the required easements.

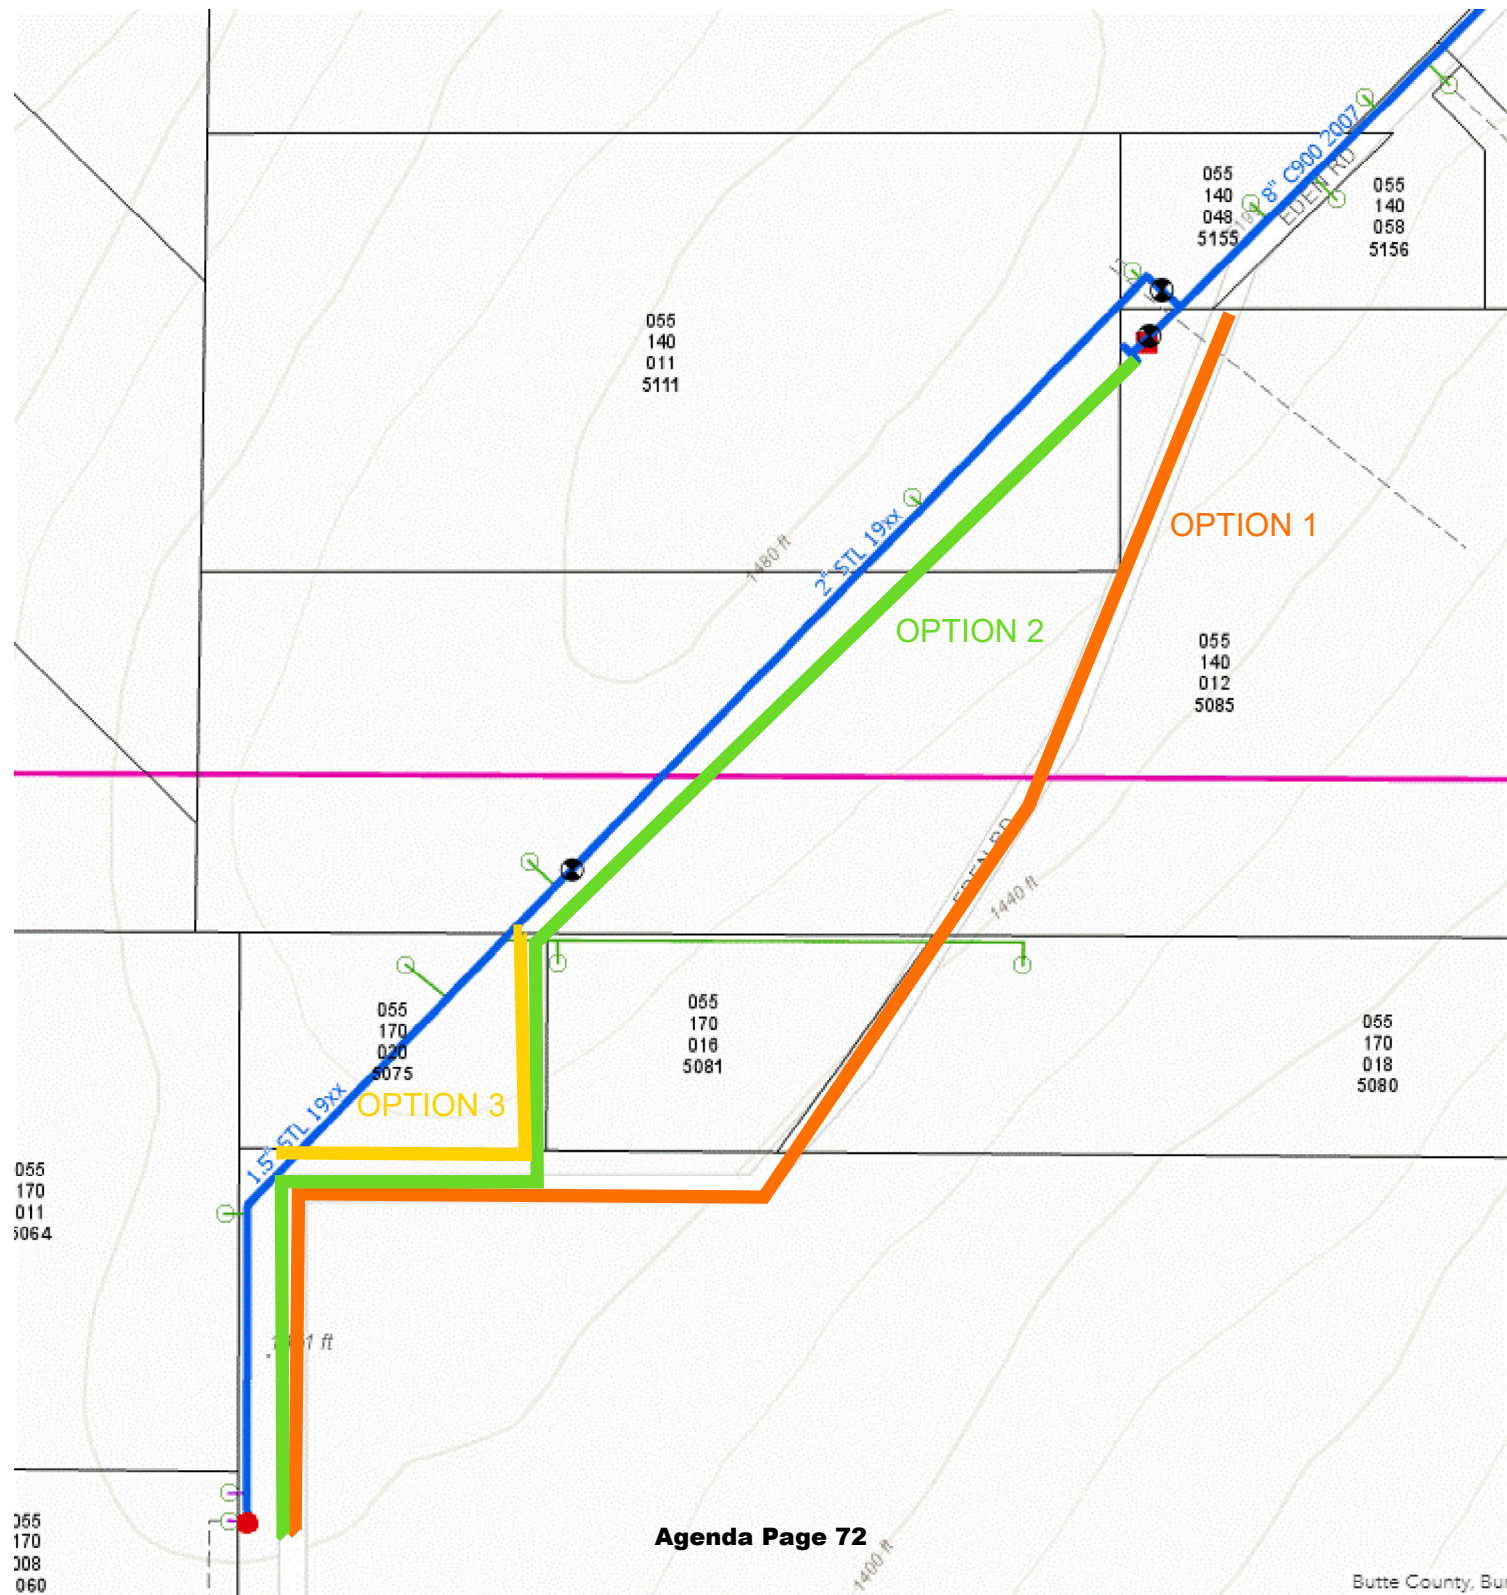

The other possibility as **(Option 2)** would be to install the main within our current easements (1250 ft), with a potential variation where new easements would be granted to change the direction for 5075 Eden Road. A very rough estimate would be \$430,000 to \$530,000.

Strictly relocating the main (350 ft), which is currently a 1-1/2” main on the property of 5075 Eden Road is not advisable **(Option 3)**. It would not be up to our current standards and would not be advantageous for anyone, but this particular property owner. There is not any advantage to the District going this route. A very rough estimate would be \$100,000 to \$150,000. There could also be major obstacles given this has been private property and we do not know what has been installed in this area.

If the Board desires to pursue this as a future project, the suggested form of motion would be:

*“I move to authorize PID staff to further evaluate Option \_\_\_\_ as a future main replacement project at Eden Road.”*

Board of Directors  
Paradise Irrigation District  
Clark Road  
Paradise, CA 95969

Dear Board of Directors,

My son Benjamin and I are Camp Fire Survivors. Our story and are scars are not much different from the many lives that have been affected by the Camp Fire.

For the last six years, we have done what many have done. Simply survived with our struggles and hopes and dreams. I am a 65 year old disabled woman and my son has helped me get through all of the challenges that we have faced since the fire. We lost our home, as so many have and have worked hard to overcome the disaster that claimed our way of life and our dreams for a beautiful life in the town we love.

Two years ago, we began working with Recover CA and have been awarded a manufactured home to be placed on our land on Eden Road. With the help of RecoverCA, the Town of Paradise, The Camp Fire Collaborative, and Northern California Catholic Services, we have slowly moved toward our dream of owning a home again and staying in Paradise.

Our home should be completed this Spring. Construction on the land has started. And we have come up with a challenge that we hope you can assist us with.

On or about February 12, 2024, we discovered a main water line that has been on our property since before Paradise Irrigation District even existed. All surveys of the land were completed and there was no mention or knowledge by the Town of Paradise or surveyors of a main water line that supposedly feeds several properties around us. An

---

easement was potentially detected but no known water main was indicated. No one could have possibly known this existed prior to us purchasing our land. The main was, it seems, put in many years ago before the area was developed as it is today.

The water main goes though the majority of our property. Almost cutting in half of the .85 acre property. We had plans in the future of building on the land that we hope to have in our family for years and years to come. This water main prevents us from attaining those goals.

We spoke to the Town of Paradise and they recommended that we ask you to add our property and this water main to your list of projects that you currently have. It is not currently on the list. Obviously, we are not in a financial situation to take on the financial burden of incurring the cost it would take to make the adjustments (even brief adjustments) to this issue. So, therefore, we come to you for help.

We are in no hurry to have an adjustment to the area affected by this water line. And in fact, we have no objections to having this water line on our property. We are, however, asking to have the line re-routed a bit to allow us to build on our property in the future. We realize the extensive work your company is undergoing to improve the Town and the water service to our neighbors and citizens. Once again, we are asking for a review of the situation and help from you for a solution to our problem for future additions to our property which is zoned for ADU's, horses etc. Which is why we bought this particular property.

I have attached the original survey for our property for your review, as well.

Thank you , in advance for considering a solution to this problem

Sincerely,

Renee M Moore

Sincerely,

Your Name

### LAND SURVEYOR'S CERTIFICATION FOR BUILDING PERMIT

Permit Number: \_\_\_\_\_

Site Address: \_\_\_\_\_

Site APN: \_\_\_\_\_

Record Map Reference (if any): \_\_\_\_\_

Book \_\_\_\_\_ Page \_\_\_\_\_ of Maps \_\_\_\_\_

Lot/Parcel Number as shown on said Map: Doc # 2022-0038812

#### Surveyor's Statement

I hereby state that a field survey was performed by me on the real property described above, or under my direction, in conformance with the requirements of the Professional Land Surveyors' Act, Business and Professions Code §§ 8700 - 8805.

I also hereby state:

- ☐ That the monuments, as shown on the above referenced Record Map, have been found, verified as to their location and exposed for inspection as of the date of this statement, and are shown on the attached Exhibit.

And/or

- ☒ That missing property corner monuments have been set, or reset, as shown on the attached Exhibit and the appropriate ~~Corner Record~~ or Record of Survey will be filed with the County of Butte.

This certification and the attached exhibit are for the sole purpose of the property corner identification of this parcel only and are not intended for public distribution or any use other than building permit clearance for the real property described above.
