Addendum #1 – 3/27/2024

Gabion Wall – Magalia Dam Spillway project – Contractor Questions at pre-bid meeting 3/26/24

1. Parking of Equipment/security – **The District will work with the Contractor to park equipment within the fenced area at the Water Treatment Plant overnight/weekends.**
2. Restroom Facilities - **Contractor will need to provide portable restroom facilities onsite.**
3. Basket materials must meet or exceed the material listed in the specifications.
4. Rock materials must meet or exceed that listed in the specifications.
5. As shown in the drawings there is no basket in the area of the chamfer at the bottom of the wall. The void created by the basket just in front of the chamfer is filled with rock.
6. As shown in the drawings the bottom set of baskets where the spillway falls off must be field modified to accommodate the taper.
7. Anchoring of baskets to floor and wall. Anchoring is called for on page 5 in notes 5 & 6. **DSOD determined that anchoring of the baskets to deteriorated concrete was not viable, and that anchoring of the baskets to the concrete is not needed. Please disregard notes 5 & 6 on sheet 5.**
8. Green gate access road, is this a public access road? **No, it isn't a public access road. The Contractor will be given keys to the gate for access. If the gate is left open the public will try to use the road as public access. We advise closing the gate when not actively going in and out.**
9. Can the Contractor improve the road access? **If the contractor would like to make improvements to the road that is fine but will be at their cost, not part of the project.**

**Our water. Our future.**
